Dear Eddie

## **NTS GCM 12: Retrospective Negative TO Entry Commodity Charge & Separate Management of K**

Statoil (UK) Ltd (STUK) is in support of this proposal, and agrees that the implementation of this charging modification would mitigate the risk of residual over recovery amounts not being fully redistributed, after any credits. To ensure correct apportionment of credits, payments should be based on relevant entry allocations from the buy-back offset mechanism and the TO Entry Commodity rebate mechanism had been paid.

STUK trusts that our comments will be given due consideration and should you wish to discuss any aspect of this response further please contact me on the above number.

Yours sincerely

Shelley Rouse.
