8 November 2010

Dear Stuart,

Indicative Notice of Intention to Revise NTS Entry Capacity Reserve and Step Prices

I am writing to give indicative notice of our intention to change the Entry Capacity Reserve Prices and Incremental Entry Step Prices for the next Quarterly System Entry Capacity (QSEC) auction which is expected to be held in March 2011.

Prices for permanently obligated and incremental entry capacity will be calculated in accordance with the arrangements set out in the latest approved Statement of the Gas Transmission Transportation Charging Methodology and the Incremental Entry Capacity Release (IECR) Methodology Statement. Please note that National Grid has consulted on changes to the IECR and a proposed IECR is with the Authority for approval.

Entry prices are set using a transportation model that will be reviewed to include:

- updated supply and demand patterns determined from the latest data in the 2010 Ten Year Statement and the balancing rules introduced by GCM-16. These updates tend to most affect terminals closest to areas where supplies have changed.
- the pipeline network expected in 2013/14 based on expected pipeline changes included in the 2010 Ten Year Statement. These changes are likely to have a relatively small impact on entry prices.
- revised investment costs by a change to the expansion constant. A change to the expansion constant would, all other things being equal, alter the range of entry prices and particularly entry terminals furthest from centres demand.
- permanent obligated capacities allocated from previous auctions. Any changes to these capacities will impact the price at that entry terminal.

The notice of the reserve and step prices to apply will be given at least two months in advance of the QSEC auction.

If you have any questions about this Indicative Notice please contact me on 01926 653445 or the Charging and Revenue Team on 01926 654633.

Yours sincerely,

Anne Bennett
