Subject: RE: National Grid Open Letter on Implementation of CAM

Dear all,

In order to harmonize process with others European TSOs, GDF SUEZ is favourable for the adoption of PRISMA as the GB interconnection point capacity booking platform.

Best regards

Isabelle Magne

Objet : National Grid Open Letter on Implementation of CAM

This message is being issued at the request of National Grid

Dear Colleague,

As you know National Grid and the other EU TSOs are required to implement the EU CAM Regulation by November 2015. One of the features of CAM is that cross-border capacity must be sold on a joint booking platform. The attached open letter gives some more information on how we currently plan to meet this obligation. I would be very happy to hear your thoughts on these plans.

If you would like to respond to the open letter please do so by email to europeanpolicy@nationalgrid.com before 20th September.
