

**Demand Assessment Report**  
**For Incremental Capacity**

**between**

***National Grid***

**and**

***Premier Transmission***

**at the Moffat Interconnection Point**

**October 2021**

This report is a joint assessment of the potential for incremental capacity projects conducted by

National Grid Gas Transmission (National Grid)

Premier Transmission Limited (PTL)

ii. Expected amount, direction and duration of demand for incremental capacity	<b>Error! Bookmark not defined.</b>
C. Conclusion for the non-initiation of an incremental capacity project/process	6
D. Fees	7
E. Contact information	8

## **A. Non-binding Demand indications**

The involved TSOs, National Grid and PTL have not received any non-binding demand indications for firm capacity at the interconnection point between the entry-exit system of National Grid and the entry-exit system of PTL for any future period.

The following application window has been included in this analysis:

- a) non-binding demand indications received within 8 weeks after the 5<sup>th</sup> July 2021

**Therefore, the amount of zero for non-binding demand indications has been used as a basis for this demand assessment.**

## **B. Demand assessment**

No demand indications were received within the current incremental process between the entry-exit system of National Grid and the entry-exit system of PTL. The potentially available capacity (i.e. technical capacity which is not yet booked in the long term) is currently sufficient to cover the anticipated future capacity requirements.

### **C. Conclusion for the non-initiation of an incremental capacity project/process**

According to the assessment result of the non-binding demand indications which indicated that no demand levels for incremental capacity exist, no incremental capacity project will be initiated.

Based on the aforementioned decision, no technical studies for incremental capacity projects will be conducted.

## **D. Fees**

### **National Grid**

A fee would have been required for the submission of any demand indications in accordance with UNC EID Section E, in order to fund technical design studies. As no demand indications were received, National Grid did not receive any fees for the evaluation and processing of non-binding demand indications

### **PTL**

A fee would have been required for the submission of any demand indications in accordance with Section 4.2 of the NI Network Gas Transmission Code, in order to fund technical design studies. As no demand indications were received, PTL did not receive any fees for the evaluation and processing of non-binding demand indications.

## E. Contact information

### National Grid Gas Transmission

Belinda Agnew

Gas Connections Contract Manager
