Secondary Capacity Product in detail

- All interested parties have to pass a qualification process first
- Secondary access to capacity is made available by a sealed bid auction
- Delivery of LNG ex-ship by secondary shipper at terminal Isle of Grain
- Redelivery of natural gas at NBP as flat band product during a specified time frame
- Secondary shipper pays auction bid (if winning bidder) and is liable for regasification costs (variable costs only, including costs for nitrogen ballasting and power) plus transportation costs (entry commodity charges, variable costs only)
- A reserve price has to be exceeded by the auction bid in order to become winning bid

Secondary Access Procedure with two steps

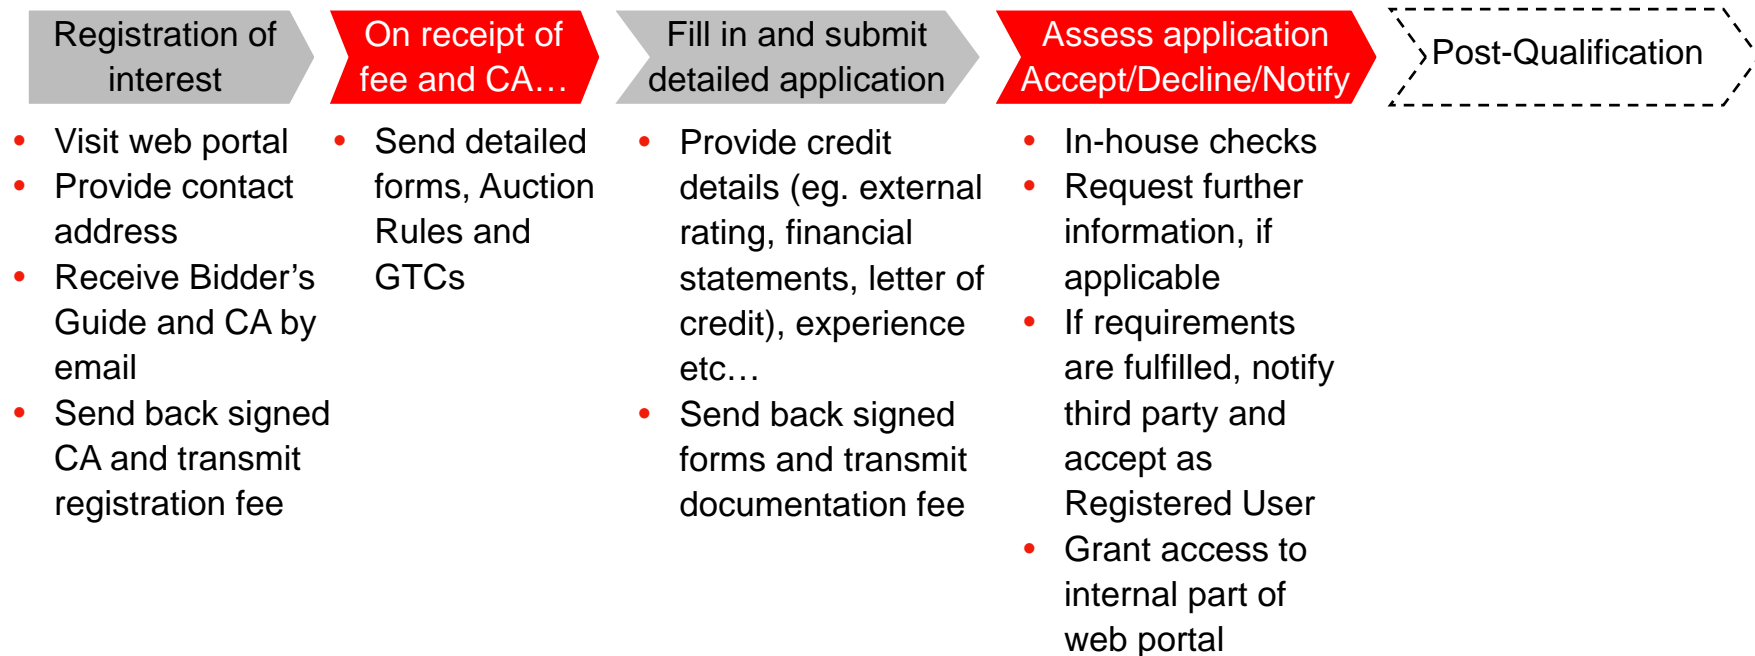

Qualification

Shall enable potential shippers and E.ON Global Commodities SE to transfer relevant business data, execute inhouse checks and exchange Confidentiality Agreements, Auction Rules and General Terms and Conditions (GTCs)

Post-qualification/Auctioning

Represents the announcement of available slots and the subsequent auction process including the exchange of necessary specific documentation in order to form a binding contract
