Thank you for the opportunity to comment on your initial consultation. We very much welcome the breadth and inclusiveness of your intended process.

Our only important observation concerns a key theme that seems to be missing from Q4a - What should we be talking to our stakeholders about?

- is anything to do with:

cost of NG's activities

value for money

timeliness (of NG undertaking its own activities - for example designing and building connections - having regard to the commercial needs of NTS users)

It may be you intend that these topics will be dealt with under other headings but in our view they should be addressed clearly and specifically as a separate theme in the interest of all stakeholders.

Regards

Fraser Ashman
