

I&C Siteworks Service Trial

As part of our commitment to improve and expand our product range we have listened to our customers and are pleased to announce the launch of a trial for a new Siteworks service prior to launching the full service later in 2014.

This new service is a fully project managed siteworks service which offers our customers a one-stop-shop service for I&C Siteworks requests i.e. a bundled connections and metering service. This co-ordinated approach is designed to take the stress away from you and deliver your project on time and on budget.

Service inclusions

- The provision of a dedicated siteworks co-ordinator who will proactively advise on progress throughout the lifecycle of the works
- A single quote for meter installation and connection work
- The excavation, construction and laying of the pipework and subsequent reinstatement
- Obtaining the necessary planning permission and authority from the relevant body
- Commissioning the new system
- The design, planning and installation of the meter
- Assurance that the infrastructure is suitable for adoption by the relevant GT.

Benefits to the customer

- Free quotations for the gas installation and connection work
- Assurance that all the work will be carried out by suitable accredited organisations
- You will be provided with a dedicated point of contact for the duration of the project which negates the need for you to enter into complex contractual relationships with multiple service providers
- The co-ordinated approach will ensure that 'it is right first time'.

If you would like to know more about the Technical Consultation Service then please contact our Commercial Account Managers on 0121 424 8144/0121 210 3593.
