Version 1.2

30<sup>st</sup> May 2014

### Introduction

Every year we perform a variety of activities on the gas National Transmission System (NTS) to maintain and develop the network. The work can take many different forms, including keeping our assets in good working order, replacing ageing assets with new equipment, inspecting assets and facilitating new connections and capacity requirements.

This Final maintenance programme is intended to provide an indication to the gas industry of the impact of work on the NTS, and any associated impact on entry or exit capacity, during the summer maintenance period (April 2014 to March 2016). This programme supersedes all previous plans.

We have provided, in this document, an overview of work scheduled at NTS compressor stations, NTS pipelines potentially impacting NTS exit points and Aggregate System Entry Points (ASEPs), and have included an indication of the revised ASEP's daily capability.

Although every effort is made to align work to any customer or associated asset outages which we have been made aware of, this is not always possible and where NTS System Exit Points are affected, we will endeavour to issue Maintenance Day notices to our customers at least 42 days in advance of the scheduled Maintenance work.

This document only includes maintenance activities on the NTS which are to be undertaken by National Grid NTS. It does not include maintenance carried out upstream of the NTS by Delivery Facility Operators (DFO's) and Producers or downstream of the NTS by the Distribution Networks.

If you have any queries or questions regarding the information contained within this document, please contact:

We would welcome any feedback from you in relation to the maintenance programme or the way in which this information is provided. If you would like to provide feedback please contact us via email at: <a href="https://www.ntsaccessplanning@nationalgrid.com">NTSaccessplanning@nationalgrid.com</a>

Further information on the maintenance activities undertaken by us is available on our website at: <a href="http://www2.nationalgrid.com/uk/industry-information/gas-transmission-system-operations/maintenance/">http://www2.nationalgrid.com/uk/industry-information/gas-transmission-system-operations/maintenance/</a>

## NTS Maintenance Work Monthly Summary

The tables over the next few pages provide a summary of the NTS compressor outages, in line inspection work and other pipeline work. The month where the work is scheduled to take place has been highlighted in the tables. If it is the case that any work which listed above has an effect on the flow of gas, affected sites are contacted individually.

#### Planned In Line Inspections

National Grid is required to carry out in-line inspections of our pipelines periodically in order to monitor and maintain their integrity, ensuring that they comply with the Pressure Systems Safety Regulations (PSSR). The in line inspection process requires a number of Pipeline Inspection Gauges (PIGs) to travel through the pipeline in order to complete a full inspection. The number of "runs", and the associated time taken for the work, can vary from pipeline to pipeline.

| In Line Inspections                       | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec | Jan | Feb | Mar |
|---|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| Feeder 2: Bacton to Wisbech               |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 3: Bacton to Roudham Heath         |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 4: Bacton to Wisbech               |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 7: Susworth Trent Crossing (North) |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 7: Susworth Trent Crossing (South) |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 10: St Fergus to Aberdeen          |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 14: Sapperton to Cirencester       |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 14: Austrey to Shustoke            |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 15: Bretherton to Warburton        |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 21: Treales to Burscough           |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 21: Carnforth to Treales           |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 21: Audley to Alrewas              |     |     |     |     |     |     |     |     |     |     |     |     |

|                                  | 2015 |    |    | 2016 |
|----------------------------------|------|----|----|------|
| In Line Inspections              | Q2   | Q3 | Q4 | Q1   |
| Feeder 5: Yelverton - Stowmarket |      |    |    |      |
| Feeder 9: Hatton - Peterborough  |      |    |    |      |
| Feeder 10: Thrunton - Saltwick   |      |    |    |      |
| Feeder 12: Bathgate - Longtown   |      |    |    |      |
| Feeder 23: Wormington - Tirle    |      |    |    |      |
| Feeder 4: Shocklach - Western PT |      |    |    |      |

#### Pipeline Work

= Pressure Restriction = Pipeline Shutdown

Pipeline work listed in this table can include diversions of existing pipelines, facilitation of connections to the NTS, and replacement or maintenance of pipeline equipment (pipes, valves, pig traps etc.) which require some form of pressure restriction or isolation. Some work can be performed by restricting the pressure of gas in the pipeline, however some work requires a full shut down (often termed "isolation" or "outage") of a section of the pipeline which would then be reinstated back to operational pressures once the work is completed.

| Pipeline Work                           | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec | Jan | Feb | Mar |
|---|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| Feeder 2: Dowlais to Dyfryn             |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 4: Warburton to Holmes Chapel    |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 4: Warburton to Partington       |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 6: Pickering to Elton            |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 6: Little Burdon to Billingham   |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 9: Brockelsby to Swallow         |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 9: Steppingley to East Ilsley    |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 10: Thrunton                     |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 10: Bathgate to Glenmavis        |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 10: Lennel North to Lennel South |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 11: Lockerbie to Waterbeck       |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 11: Longtown to Grayrigg         |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 11: River Eden                   |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 11: St Fergus to Aberdeen        |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 12: Tow Law to Crook             |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 12: St Fergus to Aberdeen        |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 13: St Fergus to Aberdeen        |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 14: Barrington to Kenn           |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 14: Dinder to Ham Street         |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 15: Longtown to Plumpton         |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 21: Brockton and Weston Bank     |     |     |     |     |     |     |     |     |     |     |     |     |
| Feeder 23: Treaddow                     |     |     |     |     |     |     |     |     |     |     |     |     |

Please note: where a pipeline is required to be shut down the specific isolation points may differ from those displayed above. Any parties impacted by the works are contacted directly.

| Feeder 6: Yarm Tees South - Kirklevington Pipeline Diversion       |      |    |    |      |

#### NTS Compressor Stations

Compressors are used to help move gas around the NTS to where it is needed, maintaining pressures required at exit points whilst avoiding over-pressurising pipelines. In order to maintain our capability at Compressor Stations, routine maintenance is performed as well as a variety of other projects to maintain and improve the fleet.

| Compressor Station | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec | Jan | Feb | Mar |
|--------------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| Outages            |     |     |     |     |     |     |     |     |     |     |     |     |
| Aberdeen           |     |     |     |     |     |     |     |     |     |     |     |     |
| Alrewas            |     |     |     |     |     |     |     |     |     |     |     |     |
| Avonbridge East    |     |     |     |     |     |     |     |     |     |     |     |     |
| Avonbridge West    |     |     |     |     |     |     |     |     |     |     |     |     |
| Aylesbury          |     |     |     |     |     |     |     |     |     |     |     |     |
| Bishop Auckland    |     |     |     |     |     |     |     |     |     |     |     |     |
| Carnforth          |     |     |     |     |     |     |     |     |     |     |     |     |
| Cambridge          |     |     |     |     |     |     |     |     |     |     |     |     |
| Chelmsford         |     |     |     |     |     |     |     |     |     |     |     |     |
| Churchover         |     |     |     |     |     |     |     |     |     |     |     |     |
| Diss               |     |     |     |     |     |     |     |     |     |     |     |     |
| Hatton             |     |     |     |     |     |     |     |     |     |     |     |     |
| Huntingdon         |     |     |     |     |     |     |     |     |     |     |     |     |
| Kings Lynn         |     |     |     |     |     |     |     |     |     |     |     |     |
| Kirriemuir         |     |     |     |     |     |     |     |     |     |     |     |     |
| Lockerley          |     |     |     |     |     |     |     |     |     |     |     |     |

## Entry Capability: Summer 2014 Maintenance

The table below shows an indicative flow capability for each Aggregate System Entry Point (ASEP), taking into account the effect of the draft maintenance programme. The volumes are displayed month by month and are based on appropriate Seasonal Normal Conditions.

In generating the ASEP capabilities, no account has been taken of any supply side (DFO) maintenance outages.

The value represents the ASEP's daily capability for each month, based on Seasonal Normal Demand conditions and for the period in the month where scheduled maintenance has most impact on capability. The analysis performed to produce the figures uses the assumption that a supply at a particular ASEP is favoured over other ASEPs. For example, in producing capability figures for St Fergus, it would be assumed that St Fergus ASEP would be flowing at its maximum for the season and the rest of the NTS supply was spread over other ASEPs.

Where no volume has been given, this indicates that the maintenance scheduled is expected to have no adverse effect on the ASEP capability.

The capability volumes shown for the individual ASEPs are indicative only, but do represent a consistent operational view.

On any given day, the amount of capability that may be available at any ASEP will depend upon the level and distribution of the demand and the level of supplies at other terminals. In cases where scheduled maintenance has an adverse effect on an ASEP's capability, National Grid may be able to make additional capability available at other ASEPs.

|               | Apr          | May          | Jun      | Jul      | Aug      | Sep      | Oct          |

### Maintenance Affected Exit Points

We aim to minimise the impact of our maintenance on customers through transparency, aligning our work with their outages as appropriate and facilitating customer needs for flexibility.

Each year we ask when our customers' outages are to enable alignment of works. If your outages move, please get in touch as early as possible so that we can consider whether we can also realign our works to reduce any impact of these works. Please contact Central Planning at GTX.CentralPlanning@nationalgrid.com

Where possible, work is co-ordinated with the end user to avoid supply disruption, however in certain circumstances it may be necessary to schedule work at a time which may require disrupting the supply to an Exit Point whilst the NTS maintenance is being completed.

Shippers, End-Users and Distribution Networks will be advised, in accordance with the Uniform Network Code (UNC) requirements and timescales, of any required disruptions to supply at an Exit Point by the issuing of a Maintenance Day(s) to the relevant party.

Maintenance Day notifications have been issued to all relevant parties for the work detailed in this maintenance programme for the period April to October 2014.

Should any changes or additions to the requested Maintenance Days be required, all relevant parties will be notified in line with the timescales detailed in the UNC.

We recognise that sometimes standard maintenance approaches may not be optimal for our customers. Where this is the case the Minor Works Agreement can enable parties to agree different maintenance approaches through a bilateral contract with directly connected customers. Customers can pay the incremental costs of working flexibly outside normal working practices where we are able to accommodate these requests. For any questions relating to Minor Works Agreements, please contact the Business and Operations Planning Team on 01926 655625.
