

MNEPOR Rule

What's changing?

- The Maximum NTS Exit Point Offtake Rate (MNEPOR) rule was implemented as part of the Exit Reform project in 2012.
- The rule applies to all users in the NTS Exit Zone at hour bar level.
- In compliance with the UNC and for the integrity of meters, ALL breaches of this rule should be rejected.

- Changes have now been applied to our monitoring system to **auto-reject** any breaches of this rule.

- MNEPOR values are available on the website at;
 - <http://www2.nationalgrid.com/uk/industry-information/gas-transmission-system-operations/capacity/>

- If you have any queries regarding the MNEPOR value for your site, please contact the Operational Compliance team.
 - GasOperations.ShipperLiaison@nationalgrid.com or 01926 656474.
