

Nominations and Corrections

Nominations and Corrections

- The GNCC have historically provided nomination and trade corrections in the event of genuine errors or system failures.
- We are finding these are becoming more routine with an increasing number of requests being received, particularly during the night.
- These are not part of our processes and taken in conjunction with the upcoming EU codes, we will be stepping back from providing these services, except for in an emergency.
- We will be engaging with Shippers who are making these requests over the next few weeks.
