

**CUSTOMER APPLICATION FOR A  
BIOMETHANE GAS TO GRID CONNECTION**

Dear Customer

Please find below an application form which requests key information that National Grid needs in order to prepare a Biomethane gas to grid connection offer for you.

Please provide as much information as possible especially all of the mandatory information, as this will form the basis of our approval paper and subsequent connection offer. It would also be helpful if you could indicate where you are in your planning application cycle.

National Grid will aim to validate your application within 2 working days from receipt of this form and in our acceptance letter will provide an indicative date for you to expect your connection offer. We will do our best to meet your requirements but please bear in mind that it can take in the region of 3 months to provide a connection offer, dependent upon the complexities of your request. Please be aware that should any of the minimum information or any of your requirements change from those provided below, then the process will take longer.

If you would like to discuss any points relating to this application form then please do not hesitate to contact Andrea Godden using the following details:
