

System Access Planning

Shipper Ops Forum, September 2014

NTS Access Planning

- What do we do?
- What do we need from you?
- Are we giving you what you need?

What we do every year...

Step 1: Get together all the pieces...

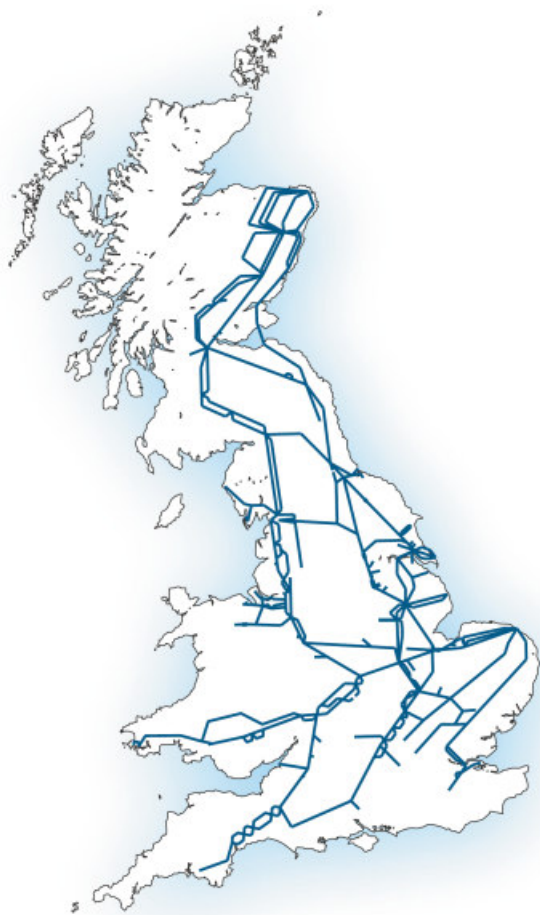

What we do every year...

Step 1: Get together all the pieces...

Step 2: Find out how they fit together...

What we do every year...

Step 3: Show you what it looks like

Step 2: Find out how they fit together...

National Grid Publication

- We have just published our latest 24 month maintenance programme on our website at

<http://www2.nationalgrid.com/uk/industry-information/gas-transmission-system-operations/maintenance/>

- Please contact the NTS Access Planning team with any questions or feedback you may have via email to:

ntsaccessplanning@nationalgrid.com

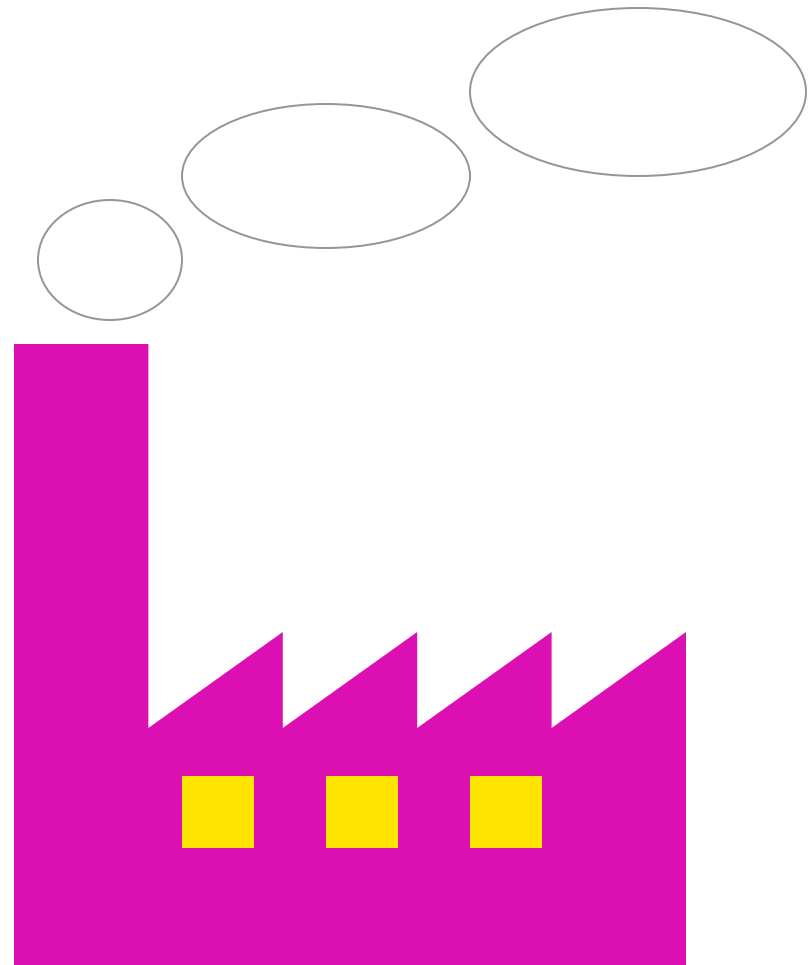

- We will publish our final Winter Maintenance Programme by 1st October following your feedback

Notice of your outages

Advanced notice of your plant outages can really help us to help you

It gives us the opportunity to align our work to yours

Minimising our impact on your operations

Notice of your outages

- Last year we aligned more than 60% of our impacting work to customer outages thanks to the information provided by you
- **Our aim is for even more alignment this year**
- You will shortly be receiving letters requesting outage information
