# 1 Query Management

## 1.1 Query Submission

A metering query can be sent via batch transfer or via the Web. Fax may be supported in some cases but the preferred method is via batch or Web. For a copy of the query fax template see section [3.13.4](#).

Batch transfer submissions require the following mandatory information:

Record	Information
Transaction	Record Identifier Transaction Type Code (Query Group e.g. AST - asset queries) Transaction Type Reason Code (Query Type e.g. FEQ = faulty equipment queries)
Meter Point	Record Identifier MPR
Query Details	Record Identifier Explanation Contact First Name Contact Second Name
Contact Mechanism	Record Identifier Contact Mechanism Code Contact Mechanism Value

Certain information becomes mandatory when certain conditions apply, e.g. if an Invoice query is being submitted, then the Invoice Identifier and Charge Details Records must be supplied.

A full list of Query Types (Transaction Type Reason Codes) is below, along with the Query Group (Transaction Type Codes) they belong to. Some queries will require interaction with both National Grid Metering and National Grid GT and the table also details whether the query type should be directed to National Grid Metering for investigation first. For example, Metering would confirm or provide correct asset details, which can then be used by the Supplier to update the GT database. Other query types, such as replicate (REP) meters would need investigation with the GT first, to establish which MPRN was correct. A "REP" query, supported by evidence from the GT, should then be sent to Metering to correct Rainbow records. Similarly, a found asset would need to be sent to the GT first, since a MPRN will need to be assigned before the details can be added to the Metering portfolio, thereby allowing a portfolio appointment request to be sent.

### **Transaction Type Codes:**

All Transaction Type Reason Codes are assigned to one of the following Transaction Type Codes:

- INVAM – Invoice Meter Rental (Including PALD)
- INVAJ – Invoice Meter Works
- AST – Asset Enquiry
- WRK – Work Enquiry

Transaction Type Reason Codes are shown below:

TRANSACTION TYPE CODE	REASON CODES	DESCRIPTION	EXPLANATION	RECIPIENT
INVAJ INVAM	ADJ	<b>Adjustment Query</b>	A query challenging the accuracy of an adjustment.	National Grid Metering
AST	ADQ	<b>Asset Details Query</b>	A query challenging the attributes of any part of the supply meter installation details held on Rainbow (meter, converter etc)	National Grid Metering
AST	CAA	<b>Consumer/Address Amendment</b>	A query challenging the meter point address or consumer details held against a meter	National Grid GT (Holder of Meter Point Address), else National Grid Metering
INVAJ INVAM	CAL	<b>Invoice Calculation Query</b>	A query challenging the way in which an Invoice charge has been calculated	National Grid Metering
INVAJ	COM	<b>Compensation Query</b>	A query relating to a claim for compensation or challenging the value of the compensation payment	National Grid Metering
*AST	CRO	<b>Crossed Meter</b>	A query identifying a potential crossed meter scenario	National Grid Metering
INVAJ	DBT	<b>Duplicated Billing</b>	A query surrounding charges billed twice for the same meter works request	National Grid Metering
AST	FEQ	<b>Faulty Equipment Query</b>	A query reporting a possible faulty piece of equipment on the supply meter installation (meter/converter/bypass etc)	National Grid Metering
*AST	FOU	<b>Found Meter Query</b>	A query notifying National Grid Metering of the existence of a meter not currently held in the MAM system. Rainbow will not validate MPRN if reason code = FOU as the MPRN would not be held in Rainbow. Once asset details have been obtained, Suppliers can appoint using NEWCN reason code, see <b>Error! Reference source not found.</b> Section 2.11 Asset Portfolio Volume 2	National Grid GT
WRK	GSB	<b>Guaranteed Standard Broken</b>	A claim for compensation following a failure to meet a guaranteed standard	National Grid Metering
INVAJ	ISR	<b>Supplier Reference Query – Meter Works Invoice</b>	A query challenging the validity of the Supplier Reference quoted against a job contained within the Meter Works Invoice	National Grid Metering
INVAM	OWN	<b>Ownership/Portfolio Dispute</b>	A query challenging the ownership of the MPRN for a specific period	National Grid Metering
*AST	REP	<b>Replicate MPRN</b>	A query relating to multiple MPRs set up on Rainbow for one	National Grid GT

			property.	
<b>AST</b>	<b>SMS</b>	<b>Supply Meter Installation Status Query</b>	A query challenging the status of the supply meter installation	National Grid Metering
<b>INVAJ</b>	<b>WNR</b>	<b>Meter Work Query</b>	A query challenging the validity of the charge for a specific work request	National Grid Metering

\* = Queries for which Supplier needs to contact the GT before National Grid Metering.

## 1.2 Incomplete Queries

Queries are not normally rejected for missing mandatory information. An incomplete query is generated and the Response file (RSENQ) supplies the (Query) Transaction Reference. This file also details the missing attributes. The exceptions to this rule are detailed in the section below.

When re-submitting an incomplete query, all the details must be provided, not just the missing details and the Transaction Reference provided in the Response file (RSENQ) should also be provided. If this reference is not provided, then the query is treated as new and reminders will still be sent for the outstanding incomplete query.

## 1.3 Query Rejections

Record	Information
Transaction	Record Identifier Transaction Type Code (Query Group e.g. AST - asset queries) Reason Code (Query Type e.g. FEQ = faulty equipment queries)
Query Details	Record Identifier Explanation Contact First Name Contact Second Name
Contact Mechanism	Record Identifier Contact Mechanism Code Contact Mechanism Value

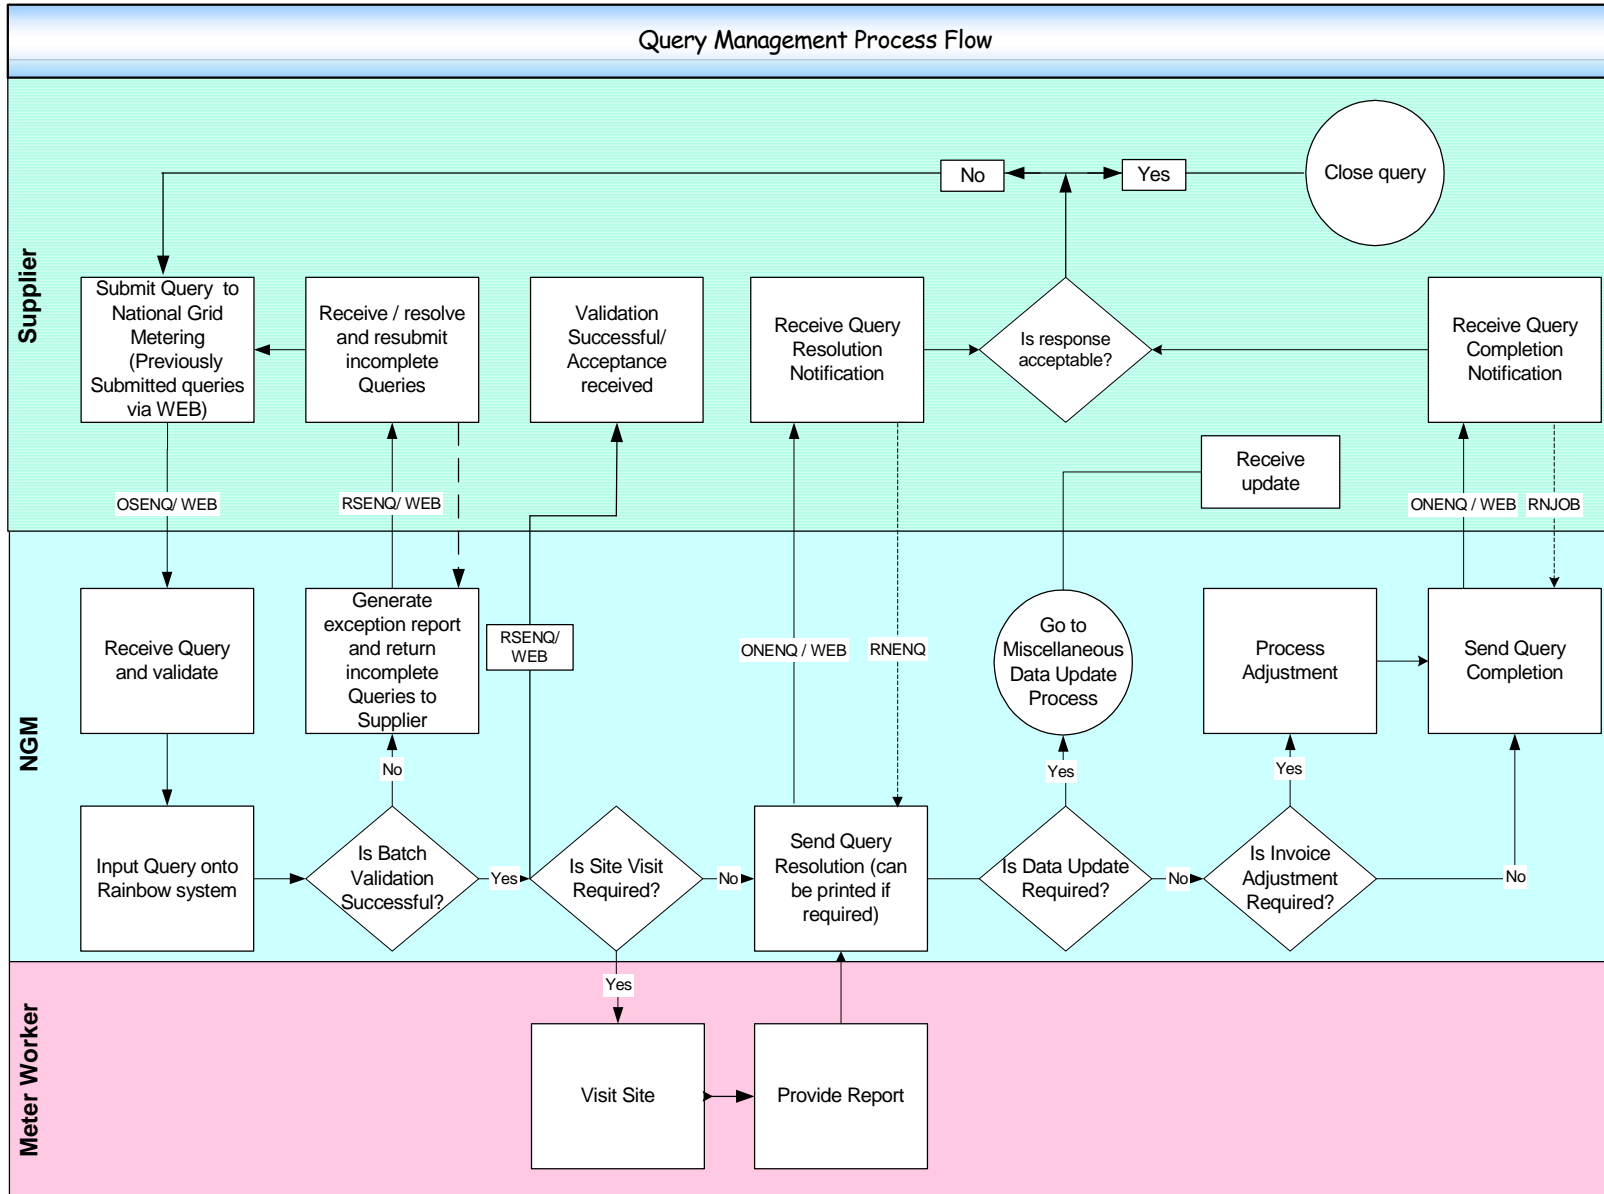

The above items are all Mandatory and will be provided when a record or file is rejected.

Non compliance to file formats at dataset level will result in transaction rejections. If "Explanation"(T0513) under query details is not provided, it will lead to rejections.

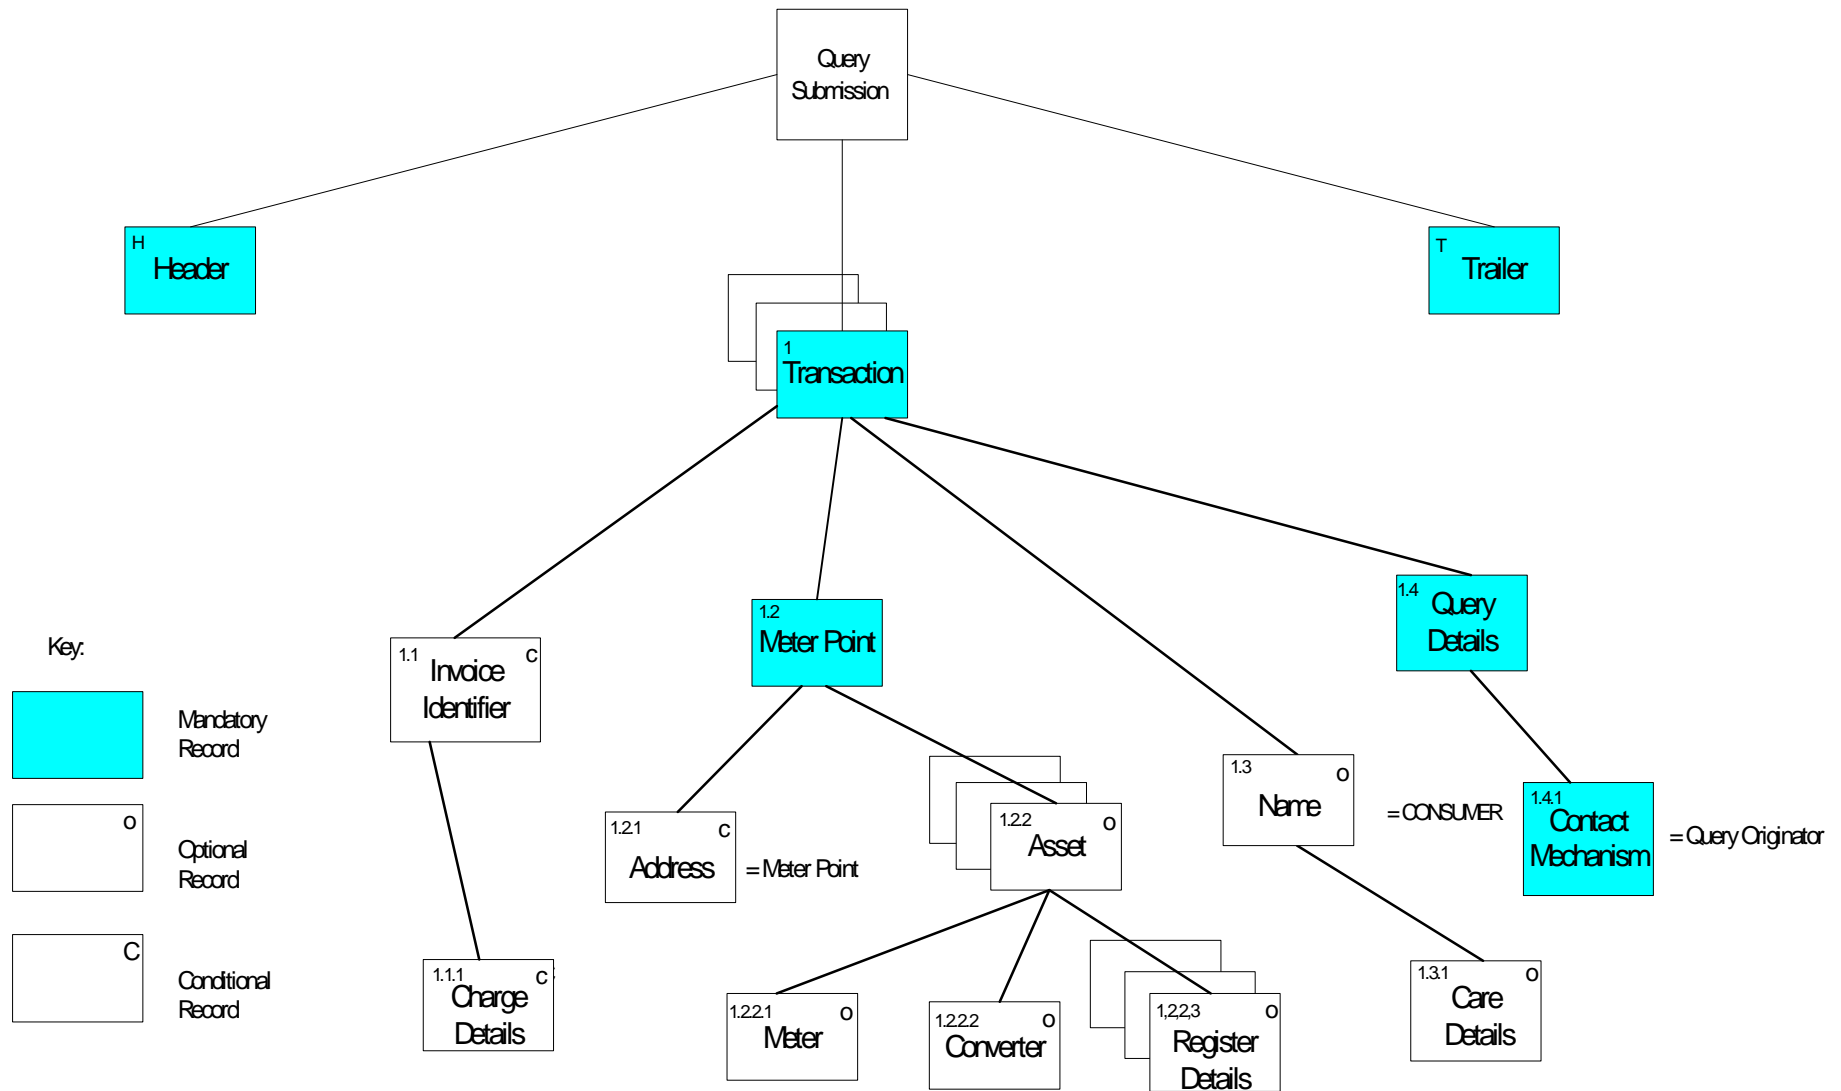

In addition, "double" queries will be rejected. This only applies to Invoice Queries, where a query is raised with the same Invoice Number, Line Item and MPRN as an existing Invoice Query.

Where the number of inaccurate or incomplete queries submitted in a file exceeds 80%, then the whole file will be rejected for resubmission.

# 1.4 Query Management Process Flow

## 1.5 Query Submission Hierarchy (OSENQ)

## 1.6 Query Submission File Format (OSENQ)

1 Transaction		1 to many (per File)		Mandatory Record			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		TRANS	MDD
A0055	O	15	Char	Transaction Reference	*	National Grid Metering generated Reference Number. Can only be supplied when re-submitting an incomplete query.	
A0056	X	210	Char	Transaction Comment			
A0053	X	25	Char	Contract Reference			
A0144	M	5	Char	Transaction Type Code	*	Values: AST (Asset), INVAJ (Works Invoice), INVAM (Rental Invoice), WRK (Work Query)	TDD
A0167	M	5	Char	Transaction Type Reason Code	*	Values: ADJ (Adjustment Query), ADQ (Asset Details Query), CAA (Address Amendment), CAL (Invoice Calculation Query), COM (Compensation Query), CRO (Crossed Meter), DBT (Duplicated Billing), FEQ (Faulty Equipment Query), FOU (Found Meter Query), GSB (Guaranteed Standard Broken), ISR (Supplier Reference Query – Meter Works Invoice), OWN (Portfolio Dispute), REP (Replicate MPRN), SMS (Supply Meter Installation Status Query), WNR (Meter Work Query)	TDD
A0058	X	15	Char	Cross-Ref Other Internal Job Reference			
A0122	X	15	Char	Cross-Ref Other External Job Reference			
A0142	X	5	Char	Transaction Status Code			MDD
A0057	X	5	Char	Transaction Status Change Reason Code			
A0161	C	1	Char	Market Sector Code	*	Mandatory if A0167 = FOU Values: D, I (Domestic, (Industrial & Commercial as defined by the Utility Act).	MDD
A0166	X	8	Date	Date of Notice			
A0068	X	5	Char	Registration Body			
A0069	X	20	Char	Registration Reference			

A0081	X	8	Date	Effective From Date			
A0082	X	8	Date	Effective To Date			

<b>1.1 Invoice Identifier</b>		0 to 1 (per Transaction)		<b>Mandatory if an Invoice Query or Work</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		INVOI	TDD
T0530	C	10	Char	Original Area invoice number	*	Mandatory if A0144=INVAM or INVAJ	
T0531	C	6	Number	Original Parent generation number	*	Mandatory if A0144=INVAM or INVAJ	
T0532	C	6	Number	Original Line item number	*	Mandatory if A0144=INVAM or INVAJ	
T0533	X	12	Char	MAM job/quote reference	*		
T0534	C	35	Char	Supplier job/quote reference	*	Mandatory if A0144=WRK or A0144=INVAJ	
T0535	X	10	Char	Adjustment Invoice Number			
T0536	X	6	Number	Adjustment Parent Generation Number			
T0537	X	6	Number	Adjustment Line Item Number			
T0538	X	15,2	Number	Adjustment Amount			

<b>1.1.1 Charge Details</b>		1 (per Invoice Identifier)		<b>Mandatory if an Invoice query</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		CHRG	TDD
T0540	C	15,2	Number	Original Charge item amount in dispute	*	Mandatory if A0144 = INVAM or INVAJ.	
T0541	C	15,2	Number	Original Charge item withheld amount	*	Mandatory if A0144 = INVAM or INVAJ Field must be completed – 0.00 can be used if necessary.	
T0542	X	15,2	Number	Current Charge item withheld amount	*	Derived by National Grid Metering.	

<b>1.2 Meter Point</b>		1 (per Transaction)		<b>Mandatory Record</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		MTPNT	MDD
A0178	X	5	Char	Data Update Code			MDD
A0072	M	10	Integer	Meter Point Reference Number			
A0076	O	1	Char	Meter Link Code	*	<u>Values: F (Freestanding)</u>	MDD
A0077	X	2	Char	Meter Point Status			MDD
A0059	O	2	Char	Location Code			MDD
A0157	C	100	Char	Meter Point Location Notes		Mandated If A0059 = Other	
A0075	O	210	Char	Access Instructions			

A0074	O	9,6	Number	Conversion Factor		Values: 0.000001 to 999.999999	
A0073	X	8	Date	Last Inspection Date			
A0164	X	9,3	Number	Metering Pressure			

<b>1.2.1 Address</b>		0 to 1 (per Meter Point)		<b>Conditional Record, mandated where A0144=AST &amp; A0167=CAA, FOU or CRO</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		ADDRS	MDD
A0102	X	5	Char	Address Type Code			MDD
A0003	X	210	Char	Address Text			
A0004	C	40	Char	Sub Building Name_Number	*	This or the next field should be provided if A0144=AST & A0167=CAA, FOU or CRO	
A0006	C	40	Char	Building Name_Number	*	This or the previous field should be provided if A0144=AST & A0167=CAA, FOU or CRO	
A0007	C	40	Char	Dependent Thoroughfare	*	This or the next field should be provided if A0144=AST & A0167=CAA, FOU or CRO	
A0008	C	40	Char	Thoroughfare	*	This or the previous field should be provided if A0144=AST & A0167=CAA, FOU or CRO	
A0009	O	40	Char	Double Dependent Locality			
A0010	O	40	Char	Dependent Locality			
A0011	C	40	Char	Post Town	*	Should be provided if A0144=AST & A0167=CAA, FOU or CRO	
A0012	X	40	Char	County			
A0013	C	10	Char	Post Code	*	Mandatory if A0144=AST & A0167=CAA, FOU or CRO	
A0015	X	7	Integer	Grid Co-ord X			
A0016	X	7	Integer	Grid Co-ord Y			
A0017	X	7	Integer	Grid Co-ord Z			
A0018	X	12	Char	Unique Property – Reference Number			

<b>1.2.2 Asset</b>		0 to many (per Meter Point)		<b>Optional Record</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		ASSET	MDD
A0178	X	5	Char	Data Update Code			MDD
A0144	X	5	Char	Transaction Type Code			MDD
A0024	O	5	Char	Asset Class Code	*	Values: BYPAS (Bypass), CONVE (Converter), DTLGR (Datalogger), METER (Meter),	MDD

A0109	X	10	Char	Product Id			MDD
A0163	O	5	Char	Payment Method code	*	Values: CR (Credit), PP (Prepayment).	MDD
A0083	O	10	Char	Model Code			MDD
A0060	O	3	Char	Manufacturer Code			MDD
A0021	O	4	Integer	Year of Manufacture			
A0022	O	14	Char	Serial Number			
A0059	O	2	Char	Location Code			MDD
A0158	O	100	Char	Asset Location Notes			
A0037	O	2	Char	Asset Status Code			MDD

<b>1.2.2.1 Meter</b>		0 to 1 (per Asset)		<b>Optional Record</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		METER	MDD
A0178	X	5	Char	Data Update Code			
A0025	O	5	Char	Meter Type Code			MDD
A0085	O	5	Char	Meter Mechanism code	*	Values: CM – Coin Meter, CR – Credit, ET – Electronic Token Meter, MT – Mechanical Token Meter, PP – PrePayment, TH – Thrift, U – Unknown	MDD
A0112	X	10,4	Number	Measuring Capacity			
A0079	X	1	Char	Meter Usage Code			MDD
A0044	X	5	Char	Collar Status Code			MDD
A0149	X	8	Date	OAMI Inspection Date			
A0126	X	5	Char	Role Code			MDD
A0160	X	8	Date	Last Refurbished Date			
A0194	X	7,2	Number	Pulse Value			

<b>1.2.2.2 Converter</b>		0 to 1 (per Asset)		<b>Optional Record</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		CONVR	MDD
A0178	X	5	Char	Data Update Code			
A0036	O	5	Char	Conversion basis Code	*	Values:– T - Temperature PT – Pressure & Temperature CPT – Compressibility, Pressure & Temperature	MDD
A0027	O	9,6	Number	Converter Conversion factor			

<b>1.2.2.3 Register Details</b>		0 to 2 (per Registering Asset)		<b>Optional Record</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		REGST	MDD
A0178	X	5	Char	Data Update Code			

A0124	X	5	Char	Register Type Code			MDD
A0121	O	2	Integer	Number of Dials or Digits		Allowable values 4-10	
A0123	O	5	Char	Units of Measure	*	Values: SCFH (Standard Cubic Feet per hour), SCMH (Standard Cubic Meters per hour).	MDD
A0120	O	6,3	Number	Multiplication factor		The multiplication factor to apply to the resultant index advance indicated by the current reading. Examples 0.1, 1, 10,100,1000	

1.3 Name		0 to 1 (per Transaction)		Optional, To be provided if National Grid Metering is to contact the customer			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		NAME	MDD
A0107	X	5	Char	Person Type Code			MDD
A0088	O	6	Char	Title			
A0089	O	4	Char	Initials			
A0090	O	30	Char	Surname			
A0100	O	100	Char	Person Notes	*	Value: Telephone Number of the Consumer	
A0101	O	30	Char	Access Password			

1.3.1 Care Details		0 to 1 (per Name per Transaction)		Optional, To be provided if National Grid Metering is to contact the customer			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		CARE	MDD
A0039	M	2	Char	Care Category Code	*	Values: 03 SEUC Unclassified 04 Aged 60+ 05 Blind 06 Braille User 07 Poor Sight 08 Deaf 09 Poor Hearing 10 Poor Speech 11 Poor Sense of Smell 12 Arthritic Hands 13 Arthritic All 14 Poor Walking 15 Wheelchair 16 Bedridden 17 Mental Handicap 18 Confused 19 Serious Illness 20 Other 21 Heart Condition 22 Breathing Difficulty	MDD

1.4 Query Details		1 (per Transaction)		Mandatory Record			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		QUERY	TDD
T0510	O	1	Char	Top Priority		Top priority flag	
T0511	O	35	Char	Reference Number	*	Supplier Reference Number	

T0512	O	14	Char	Existing serial number			
T0513	M	1000	Char	Explanation	*	Reason for raising query	
T0514	O	1	Char	Additional information supplied			
T0515	X	3	Char	Justified			
T0516	X	8	Date	Date Logged			
T0517	X	8	Date	Date Resolved			
T0502	M	35	Char	Contact First Name	*	Mandatory for all queries	
T0503	M	35	Char	Contact Second Name	*	Mandatory for all queries	

1.4.1 Contact Mechanism		1 (per Query Details)		Mandatory Record			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier	*	CONTM= Requestors Details	MDD
A0049	M	5	Char	Contact Mechanism Code	*	Values: EMAIL (E-Mail), FAX (Facsimile), MOBIL (Mobile Phone), PAG (Pager), TEL (Telephone), TEX (Telex). POST – Letter sent land/sea/airmail, VISIT – Visit.	MDD
A0106	M	100	Char	Contact Mechanism Value			

## 1.7 Query Response File (RSENQ)

When the batch file is received, file level validation is undertaken and a response file is sent. This file is very similar to the standard response file, however, it is necessary to also return the Invoice Identifier Record where an invoice query has been submitted. Without this extra information, it may not be possible for the originator to identify the specific query.

Providing the file is acceptable, transaction level validation is undertaken, however, the query will not be rejected for incompleteness, instead the response will detail the field(s) required.

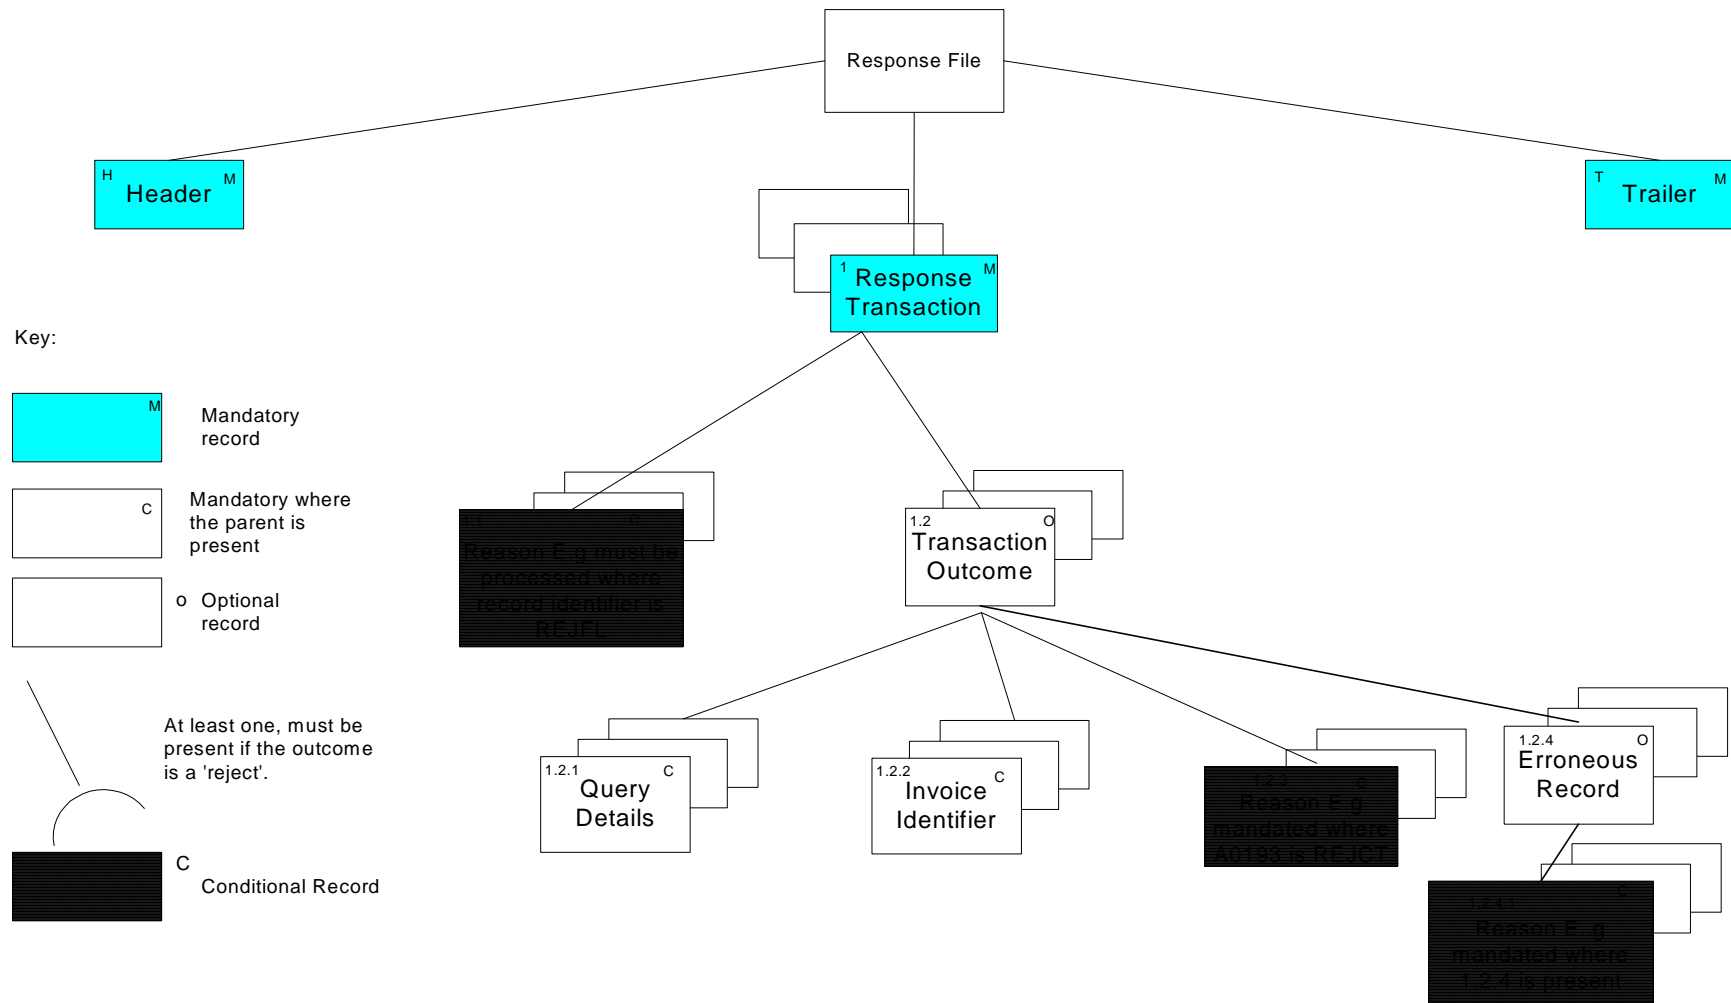

The optionality of the fields within the Response assumes that all data is provided, however, when complete data has not been provided the response will contain blank fields even though the format states "M". For example, if an invoice query is raised, then the Invoice Record within the Query Submission File becomes mandatory. If the originator fails to provide the Area Invoice Number, the Query Response File would itemise this as a missing field and T0530 would not be populated.

The requester must resubmit **the entire query** (not just the missing fields), using the transaction reference already assigned by National Grid Metering. If this information is not supplied within 5 working days, then a reminder is sent and after 10 working days, the incomplete query is automatically closed, with a further notification being sent to the originator (see Section [1.104-10](#)- Query Notification for details).

Erroneous record will be provided only for enquires that are received via OSENQ and when the enquiry is either incomplete or rejected.

**Acknowledgement will be sent using RSENQ for enquires that are submitted using all forms of submission.**

# 1.8 Query Response Hierarchy (RSENQ)

## 1.9 Query Response File Format (RSENQ)

<b>1 Response Transaction</b>		1 to many (per file)		<b>Mandatory Record</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier	*	REJFL if the file has been rejected, otherwise RESPN.	MDD
A0186	C	8	Char	File Identifier	*	This must be present where the file is being rejected.	
A0184	C	8	Char	Created Date	*	This must be present where the file is being rejected.	
A0185	C	6	Char	Created Time	*	This must be present where the file is being rejected.	

<b>1.1 Reason</b>		0 to many (per Response Transaction)		<b>This must be provided where the Response Transaction Record Identifier is REJFL.</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		REJRS	MDD
A0173	O	5	Char	Attribute Number			
A0190	M	5	Char	Response Code			MDD
A0192	O	210	Char	Response Notes			

<b>1.2 Transaction Outcome</b>		0 to many (per Response Transaction)		<b>This is provided where there is a response at the record and/or data item level.</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier	*	TROUT	MDD
A0193	M	5	Char	Outcome Code	*	Values: ACCPT – Accept, REJCT - Reject	MDD
A0072	O	10	Integer	Meter Point Reference Number			
A0055	C	15	Char	Transaction Reference	*	Mandatory where A0193 = ACCPT	
A0144	C	5	Char	Transaction Type Code	*	Mandatory where A0193 = ACCPT	
A0142	X	5	Char	Transaction Status Code			

<b>1.2.1 Query Details</b>		1 to many (per Transaction Outcome)		<b>Mandatory Record</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		QUERY	TDD
T0510	O	1	Char	Top Priority			
T0511	O	35	Char	Reference Number	*	Supplier Reference Number	
T0512	O	14	Char	Existing serial number			
T0513	X	1000	Char	Explanation			
T0514	X	1	Char	Additional information supplied			
T0515	X	3	Char	Justified		Values:	

						Y = Yes N = No	
T0516	X	8	Date	Date Logged			
T0517	X	8	Date	Date Resolved			
T0502	M	35	Char	Contact First Name	*	Mandatory for all queries	
T0503	M	35	Char	Contact Second Name	*	Mandatory for all queries	

<b>1.2.2 Invoice Identifier</b>		0 to many (per Transaction Outcome)		<b>Conditional Record, Mandatory if invoice query or work</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		INVOI	TDD
T0530	C	10	Char	Original Area invoice number	*	Mandated if INV and supplied in OSENG	
T0531	C	6	Number	Original Parent generation number	*	Mandated if INV and supplied in OSENG	
T0532	C	6	Number	Original Line item number	*	Mandated if INV and supplied in OSENG	
T0533	X	12	Char	MAM job/quote reference	*	Mandated if INVAJ and supplied in OSENG	
T0534	C	35	Char	Shipper job/quote reference	*	Mandated if INVAJ and supplied in OSENG	
T0535	X	10	Char	Adjustment Invoice Number			
T0536	X	6	Number	Adjustment Parent Generation Number			
T0537	X	6	Number	Adjustment Line Item Number			
T0538	X	15,2	Number	Adjustment Amount			

<b>1.2.3 Reason</b>		0 to many (per Response Transaction)		<b>Conditional Record, Mandated where A0193 = REJCT</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		REJRS	MDD
A0173	O	5	Char	Attribute Number	*	This may be included where a data item can be identified as part of the source of the exception.	
A0190	M	5	Char	Response Code	*	Values: in Appendix	MDD
A0192	O	210	Char	Response Notes			

<b>1.2.4 Erroneous Record</b>		0 to many (per Transaction Response)					
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
This will contain the record in Error							

<b>1.2.4.1 Reason</b>		0 to many (per Erroneous Record)		<b>Conditional Record, Mandated where 1.2.4 is present</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier	*	REJRS	MDD
A0173	M	5	Char	Attribute Number		If the attribute cannot be identified, the rejection will be reported at the record level (1.2.3).	
A0190	M	5	Char	Response Code			MDD
A0192	O	210	Char	Response Notes			

## 1.10 Query Notification File (ONENQ)

There are four different Query Notification Files:

- 5 day reminder
- 10 day closure
- Resolution
- Completion

The optionality of the fields within the Response assumes that all data is provided, however, when complete data has not been provided the response will contain blank fields even though the format states "M". For example, if an invoice query is raised, then the Invoice Record within the Query Submission File becomes mandatory. If the originator fails to provide the Area Invoice Number, the Query Response File would itemise this as a missing field and T0530 would not be populated. Data not recognised will be reported as missing for reminder and closure notice.

### **5 Day Reminder**

This file is sent where an incomplete query has been submitted. After 5 working days, a reminder is sent via batch file if the originator has failed to resubmit the query. This notification once again details the missing fields

### **10 Day Closure**

If the originator has not resubmitted the missing information to complete the query within 10 working days, then the query is automatically closed and this notification is sent. The originator would then need to resubmit the query from scratch if an answer is still required.

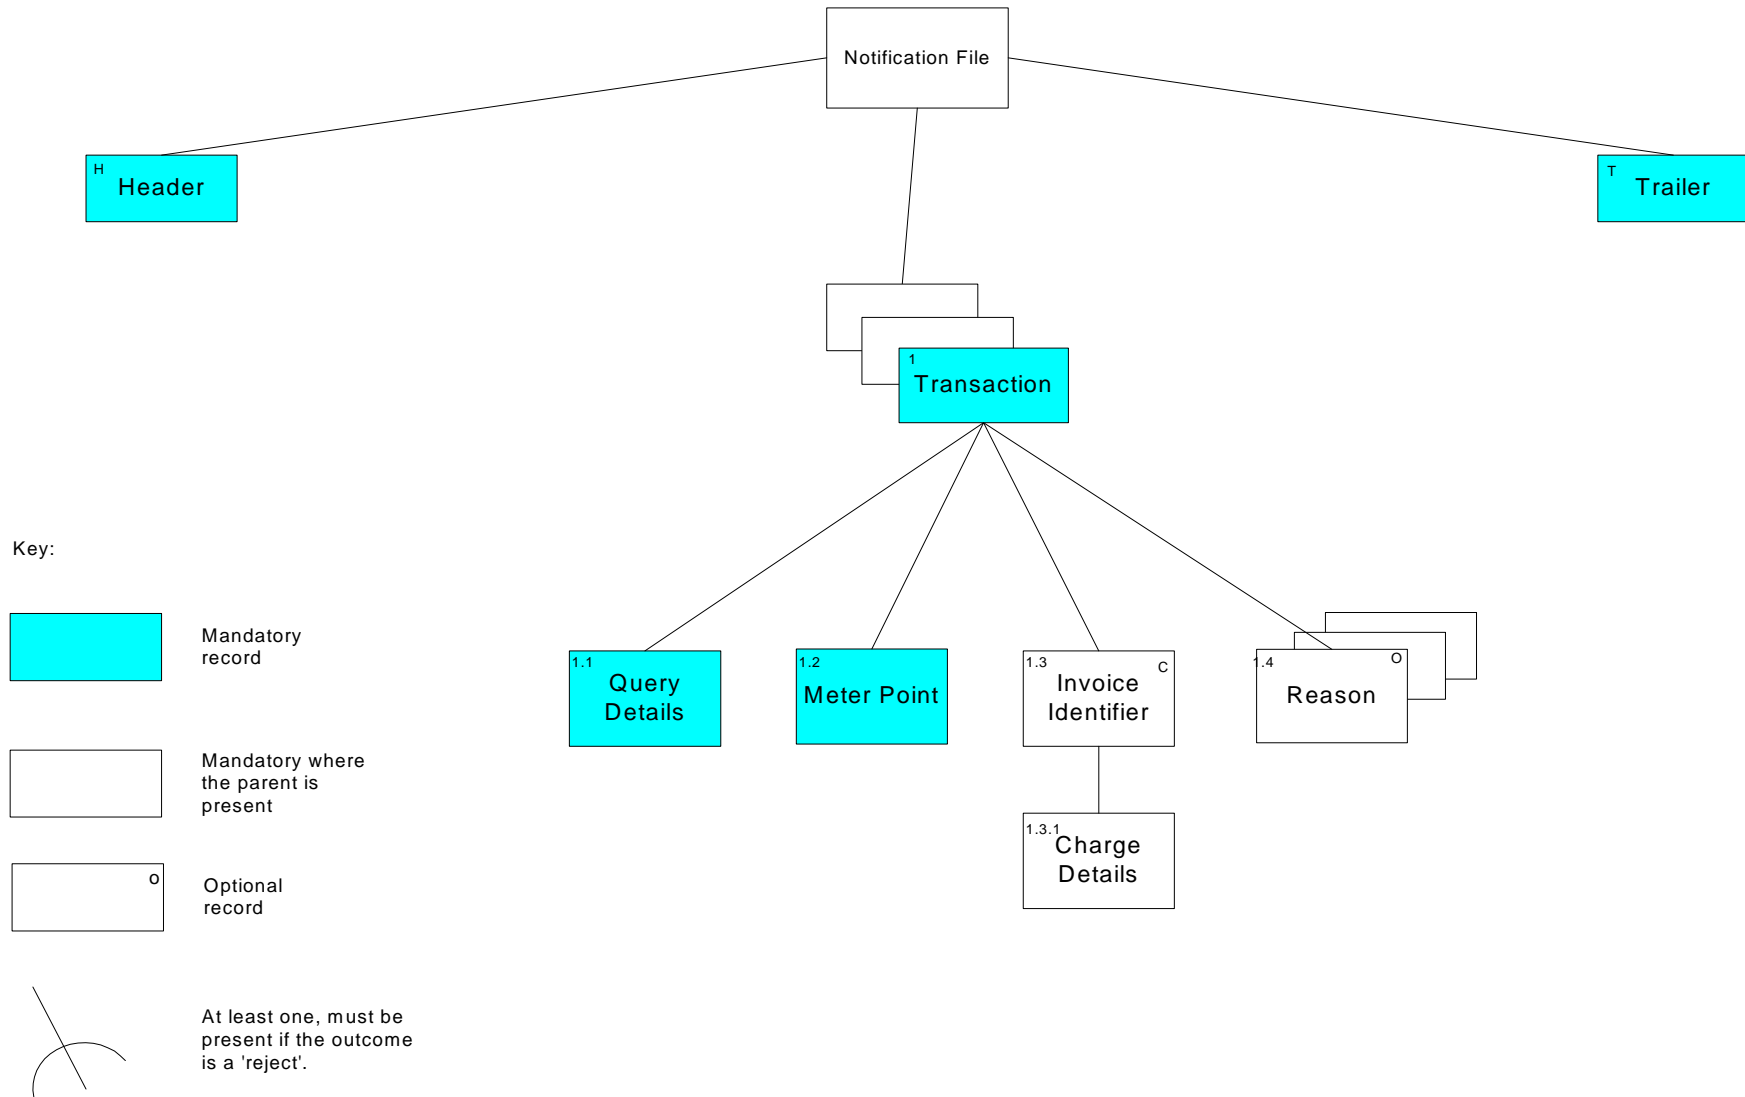

### **Resolution**

This notification includes a text field with the answer to the enquiry logged. This is to facilitate the monitoring of performance. Where an incomplete query was initially received, the date logged is the date the complete query was resubmitted. An ONENQ file will be sent regardless of the means of submission.

### **Completion**

This notification incorporates details of any adjustment. Adjustments may be in response to an invoice query, or any other query where it is established that an incorrect charge has been invoiced. Completion notifications are sent, regardless of whether there is any financial adjustment or any withheld amount and in these cases, the associated fields will incorporate a value of £00.00.

# 1.11 Query Notification Hierarchy (ONENQ)

## 1.12 Query Notification Format – Progress, Resolution & Completion (ONENQ)

1 Transaction		1 to many (per File)		Mandatory Record			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		TRANS	MDD
A0055	M	15	Char	Transaction Reference	*	Reference from the original query.	
A0056	X	210	Char	Transaction Comment			
A0053	X	25	Char	Contract Reference			
A0144	M	5	Char	Transaction Type Code	*	Values: AST (Asset), INVAJ (Works Invoice), INVAM (Rental Invoice), WRK (Work Query)	TDD
A0167	M	5	Char	Transaction Type Reason Code	*	Values: ADJ (Adjustment Query), ADQ (Asset Details Query), CAA (Consumer/ Address Amendment), CAL (Invoice Calculation Query), COM (Compensation Query), CRO (Crossed Meter), DBT (Duplicated Billing), FEQ (Faulty Equipment Query), FOU (Found Meter Query), GSB (Guaranteed Standard Broken), ISR (Supplier Reference Query - Meter Works Invoice), OWN (Ownership/Portfolio Dispute), REP (Replicate MPRN), SMS (Supply Meter Installation Query), WNR (Meter Work Query).	TDD
A0058	X	15	Char	Cross-Ref Other Internal Job Reference			
A0122	X	15	Char	Cross-Ref Other External Job Reference			
A0142	M	5	Char	Transaction Status Code	*	Values: REMND -5 Day Reminder, CLOSE - 10 Day Auto Closure, RESLV - Resolution, COMPL- Completion	TDD
A0057	X	5	Char	Transaction Status Change Reason Code			
A0161	X	1	Char	Market Sector Code			MDD
A0166	X	8	Date	Date of Notice			
A0068	X	5	Char	Registration Body			

A0069	X	20	Char	Registration Reference			
A0081	X	8	Date	Effective From Date			
A0082	X	8	Date	Effective To Date			

<b>1.1 Query Details</b>		1 (per Transaction)		<b>Mandatory Record</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		QUERY	TDD
T0510	O	1	Char	Top Priority			
T0511	O	35	Char	Reference Number	*	Supplier Reference Number	
T0512	X	14	Char	Existing serial number			
T0513	C	1000	Char	Explanation	*	Resolution text (not original Explanation). Mandatory for Resolutions. Will be used to capture any possible meter read.	
T0514	X	1	Char	Additional information supplied			
T0515	C	3	Char	Justified	*	Identifies whether the query is valid. Values: Y = Yes N = No Mandatory for Response Record Type: RESLV only	
T0516	M	8	Date	Date Logged	*	For REMND and CLOSE = Date Received For RESLV and COMPL = Date Logged	
T0517	C	8	Date	Date Resolved	*	Mandatory for Response Record Type: RESLV	
T0502	M	35	Char	Contact First Name	*	Mandatory for all queries	
T0503	M	35	Char	Contact Second Name	*	Mandatory for all queries	

<b>1.2 Meter Point</b>		1 (per Transaction)		<b>Mandatory Record</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		MTPNT	MDD
A0178	X	5	Char	Data Update Code			MDD
A0072	C	10	Integer	Meter Point Reference Number	*	Provided where supplied in OSENG	
A0076	X	1	Char	Meter Link Code			MDD
A0077	X	2	Char	Meter Point Status			MDD
A0059	X	2	Char	Location Code			MDD
A0157	X	100	Char	Meter Point Location Notes			
A0075	X	210	Char	Access Instructions			
A0074	X	9,6	Number	Conversion Factor			
A0073	X	8	Date	Last Inspection Date			
A0164	X	9,3	Number	Metering Pressure			

<b>1.3 Invoice Identifier</b>		0 to 1 (per Transaction)		<b>Mandatory if Invoice Enquiry or work</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		INVOI	TDD
T0530	C	10	Char	Original Area invoice number		Mandated where A0167 = INVAJ or INVAM	
T0531	C	6	Number	Original Parent generation number		Mandated where A0167 = INVAJ or INVAM	
T0532	C	6	Number	Original Line item number		Mandated where A0167 = INVAJ or INVAM	
T0533	X	12	Char	MAM job/quote reference			
T0534	C	35	Char	Supplier job/quote reference	*	Mandated where A0167=INVAJ and Work	
T0535	O	10	Char	Adjustment Invoice Number			
T0536	O	6	Number	Adjustment Parent Generation Number			
T0537	O	6	Number	Adjustment Line Item Number			
T0538	O	15,2	Number	Adjustment Amount			

<b>1.3.1 Charge Details</b>		0 to 1 (per Invoice Identifier)		<b>Mandatory if 1.3 exists</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier	*	CHARGE	TDD
T0540	C	15,2	Number	Charge item amount in dispute	*	Mandatory if INV	
T0541	C	15,2	Number	Original Charge item withheld amount	*	Mandatory if INV	
T0542	C	15,2	Number	Current Charge item withheld amount	*	Mandatory if INV Derived by National Grid Metering.	

<b>1.4 Reason</b>		0 to many (per Transaction)		<b>Conditional Record, Mandated where A0142=REMND</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		REJRS	MDD
A0173	O	5	Char	Attribute Number			
A0190	M	5	Char	Response Code			
A0192	O	210	Char	Response Notes			

## 2 Invoicing

### 2.1 Invoices

There are two different main Invoice categories, which are submitted on a monthly basis:

- Metering Asset Invoices
- Asset Works Invoices

Metering Invoices are split into geographic zones (by postcode out code). The default position is for the Invoices to be divided into out code based zones closely matching the LDZ boundaries used for Transportation Invoices

This section also includes invoicing for Pre-Appointment Liquidated Damages (PALD), where a meter is installed following a request from a supplier and then no appointment file is received for that asset. The agreed format and supporting information for these charges are identical to the Metering Asset Invoices, however, the payment terms match those of the Metering Asset Works Invoice.

### 2.2 Metering Asset Invoice (MAV/IAV)

Invoice for the provision, maintenance and installation of metering equipment for a given billing period. This file provides overall total charges and also total charges for:

- Each geographic area, split by postcode out code
- Each charge item within a geographic area
- Number of assets and chargeable days for those assets for each charge band

### 2.3 Metering Asset Ad Hoc Adjustment Invoice (MAH/IAH)

Ad-hoc, or manual adjustments invoice for the provision, maintenance and installation of metering equipment for a given billing period. The file consists of adjustments from:

- One off retrospective charge band changes
- Charges for items from previous billing periods that were not billed for
- Credit charges for items from previous billing periods that were incorrectly billed for
- Debit charges for items from previous billing periods that were incorrectly billed for

This file provides overall total charges and also total charges for:

- Each geographic area, split by postcode out code
- Each charge item within a geographic area
- The original and revised amounts for the affected assets for each charge band

## **2.4 Metering Asset Standard Adjustment Invoice (MAJ/IAJ)**

Standard, or automated, adjustments invoice for the provision, maintenance and installation of metering equipment for a given billing period. The file consists of adjustments for:

- Retrospective charge band changes
- Charges for items from previous periods that were not billed for
- Credit charges for items from previous billing periods that were incorrectly billed for
- Debit charges for items from previous billing periods that were incorrectly billed for

As well as overall totals, this file provides total charges for:

- Each geographic area, split by postcode out code
- Each charge item within a geographic area
- The original and revised amounts for the affected assets for each charge band

## **2.5 Asset Works Invoice (AWI/IWI/AWI/IWI/IWI)**

Invoice for one off work performed on metering equipment for a given billing period. This file supplies details of the total charges for:

- Each geographic area, split by postcode out code
- Each job type within a geographic area
- Each individual job

## **2.6 Asset Works AdHoc Adjustment Invoice (AWH/IWH)**

Adjustments for one off work performed on metering equipment. The file consists of adjustments for:

- Jobs not billed in previous billing periods (credit or debit)
- Charges to jobs in previous billing periods
- Interest charges
- Liquidated damages charges
- Liability charges

As well as overall totals, this file provides total charges for:

- Each geographic area, split by postcode out code
- Each job type within a geographic area
- Credit charges for items from previous billing periods that were incorrectly billed for
- Debit charges for items from previous billing periods that were incorrectly billed for.

## 2.7 Pre-Appointment Liquidated Damages (PALD) Invoice (MFV/IFV)

(Faux Rental) Invoice for the provision, maintenance and installation of metering equipment for a given billing period, where a meter is installed by request of the supplier and then no appointment file is received for that asset. This file provides overall total charges and also total charges for:

- Each geographic area, split by postcode out code
- Each charge item within a geographic area
- Number of assets and chargeable days for those assets for each charge band

## 2.8 Supplementary Back-Up Files – Rental Invoices

In addition to the Invoice files specified, the following supplementary files will be issued in conjunction with the Asset Invoices (MAV/IAV & MAJ/IAJ). The purpose of these back-up files is to provide the Supplier with sufficient information, at MPRN level, to enable Invoice validation and Query submission. The Supplementary Backup files are not RGMA files and therefore are not bound by the same specifications as RGMA files e.g. Supplementary Back-Up Files do not follow the same convention as described in section 1.8 Asset Portfolio Volume 1.

The following table illustrates the mapping between which back up files support which invoice:

Invoice	Supplementary Back up
MAV/IAV	MDN/GDN, MDC/GDC
MAJ/IAJ	MDA/GDA

### Asset Daily Count File (MDC/GDC)

This file provides a break down by charge band of the number of assets that incurred charges within a geographic area (by postcode out code) on a specific day within a billing period.

### Invoice Asset Detail File (MDN/GDN)

This file provides meter point level detail of standard charges for the provision, maintenance and installation of metering equipment over a given billing period in a geographic area (by postcode out code).

### Invoice Asset Detail File – Adjustments (MDA/GDA)

This file provides meter level details of adjustments to charges for provision, maintenance and installation of metering equipment over a given billing period in a geographic area (by postcode out code).

## 2.9 Supplementary Back-Up Files – PALD Invoice

In addition to the Invoice files specified, the following supplementary files will be issued in conjunction with the Pre-Appointment Liquidated Damages (PALD) Invoice (MFV/IFV). The purpose of these back-up files is to provide the Supplier with sufficient information, at MPRN level, to enable Invoice validation and Query submission.

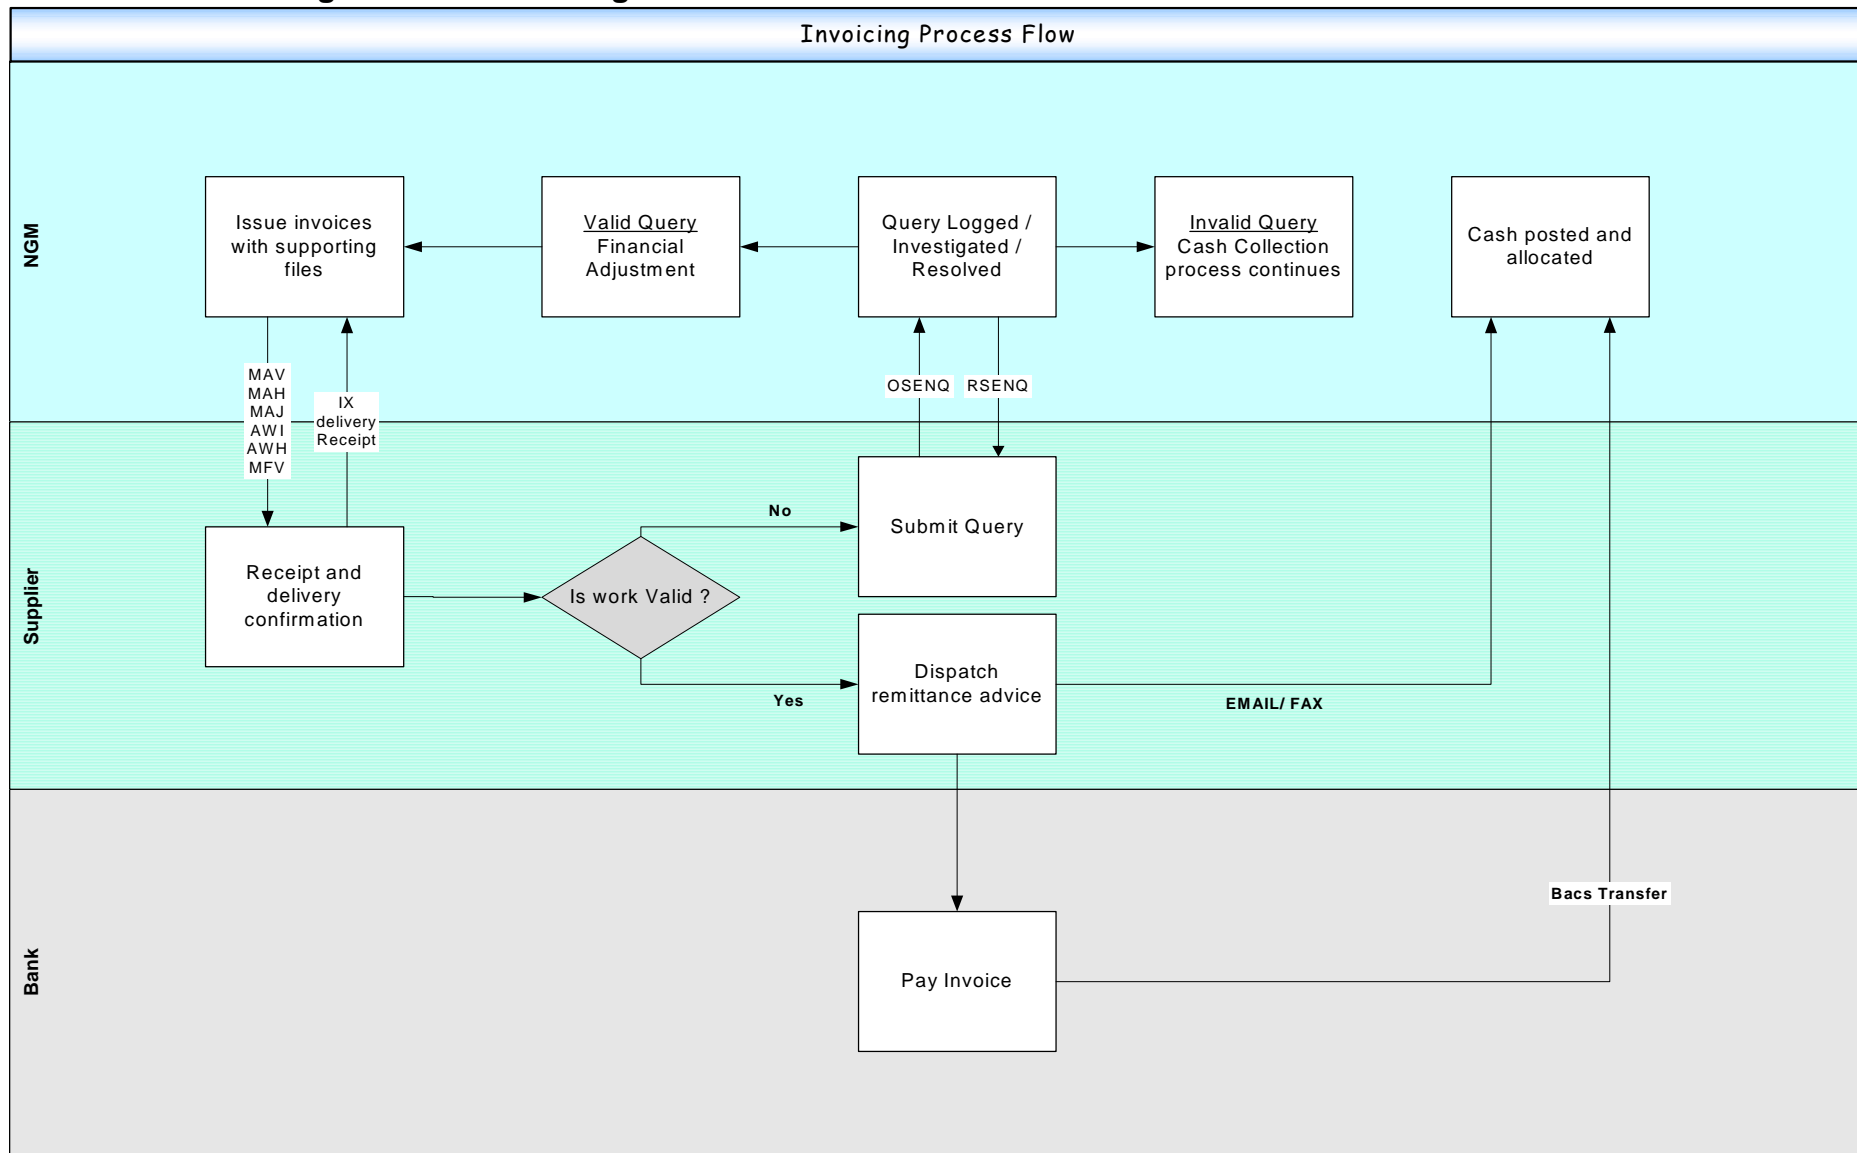

### PALD Asset Daily Count File (MFC/GFC)

This file provides a break down by charge band of the number of assets that incurred charges within a geographic area (by postcode out code) on a specific day within a billing period.

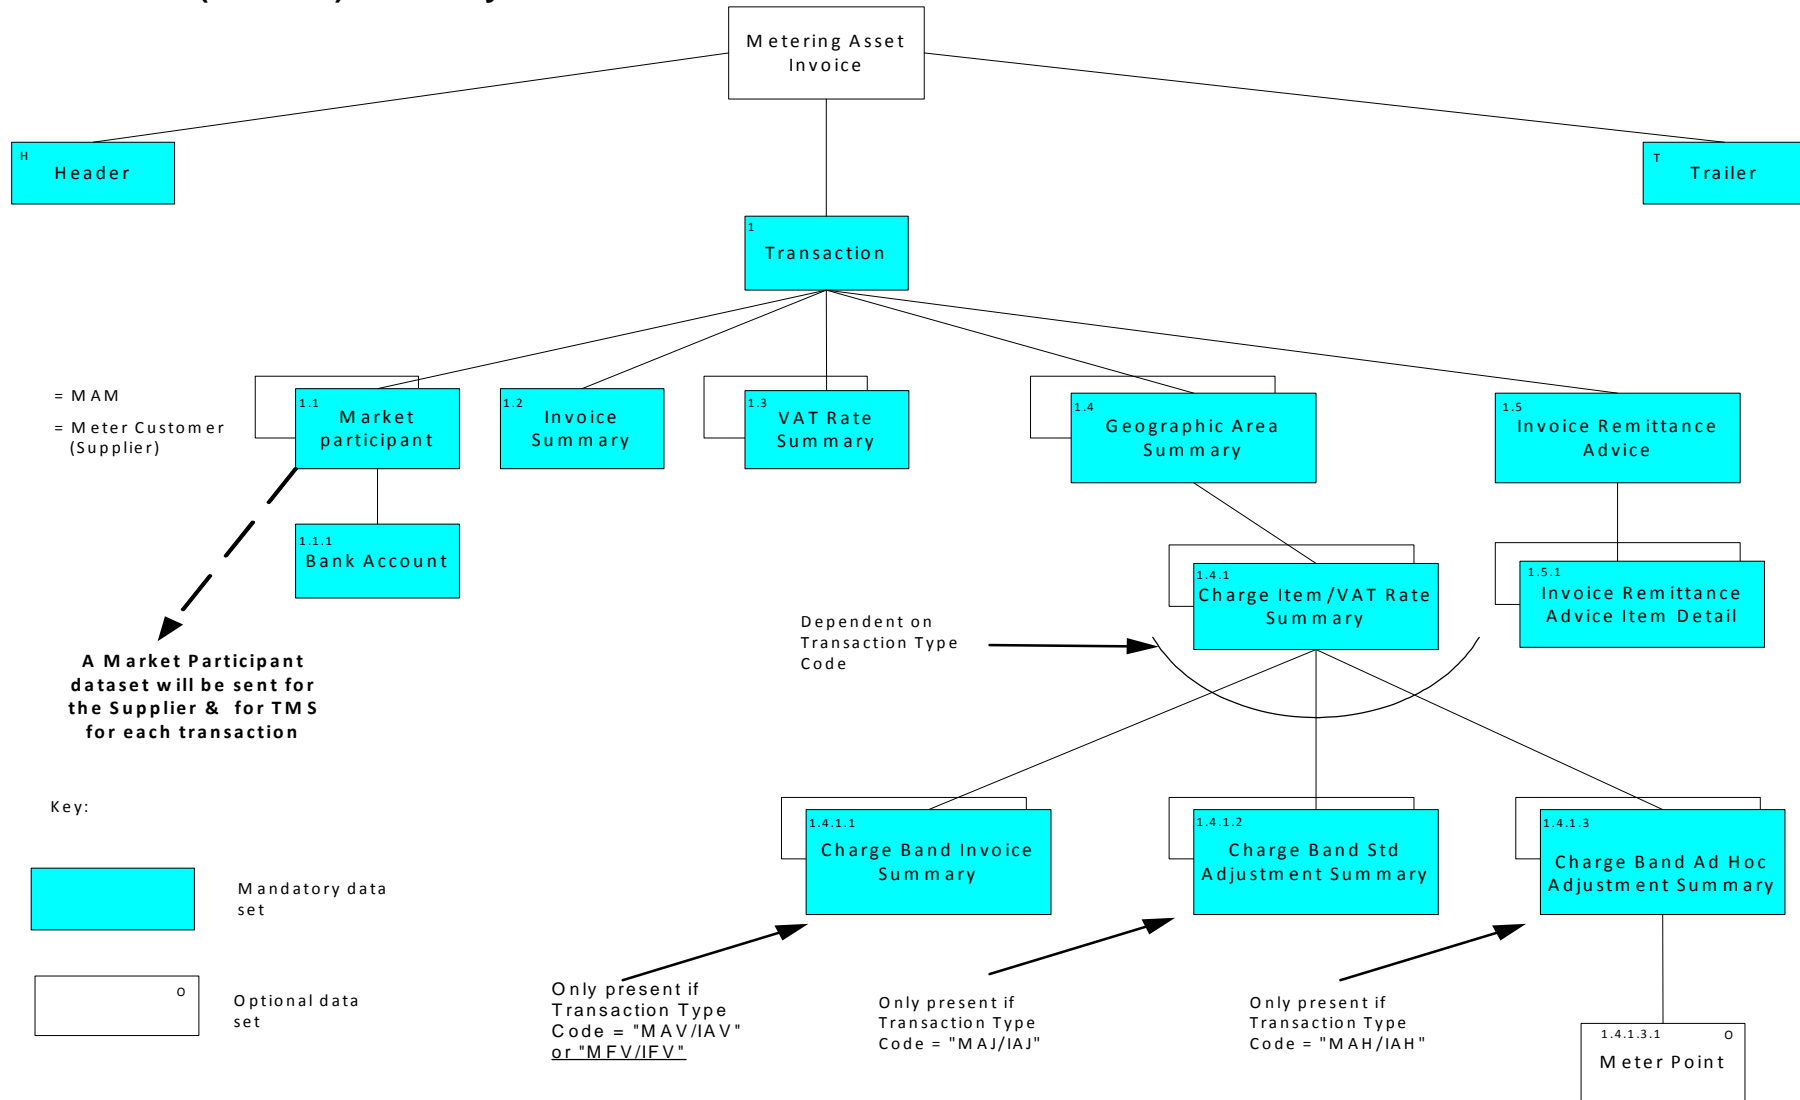

### PALD Invoice Asset Detail File (MFN/GDN)

This file provides meter point level detail of standard charges for the provision, maintenance and installation of metering equipment over a given billing period in a geographic area (by postcode out code).

## 2.10 Invoicing Process Flow Diagram

## 2.11 Metering Asset Rental Invoices (MAV/IAV, MAJ/IAJ, MAH/IAH) & Pre-Appointment Liquidated Damages Invoice (MFV/IFV) Hierarchy

## 2.12 Metering Asset Invoice & Pre-Appointment Liquidated Damages Invoice File Format

<b>1 Transaction</b>		1 to 1 (per File)		<b>Mandatory Record</b>			
Attribute Number	Optional or Mandatory	Field Length	Field Format	Description	Key	Rules	MDD or TDD
A0177	M	5	Char	Record Identifier		<b>TRANS</b>	MDD
A0055	M	15	Char	Transaction Reference	*	Contains Invoice Reference (currently, file generation number is used)	
A0056	M	210	Char	Transaction Comment	*	Indicates whether the invoice file is an original or a copy. Contains either 'Original' or 'Copy'.	
A0053	O	25	Char	Contract Reference			
A0144	M	5	Char	Transaction Type Code	*	Indicates that the transaction is a Metering Asset/Pre-Appointment Liquidated Damages Invoice. Contains one of the following values, indicating the type of invoice detailed within the file: "MAV/IAV" i.e. Metering Asset Invoice "MAJ/IAJ" i.e. Metering Asset Standard Adjustment Invoice "MAH/IAH" i.e. Metering Asset Ad Hoc Adjustment Invoice "MFV/IFV" i.e. Pre-Appointment Liquidated Damages (PALD)Invoice	TDD

## 2.15 Supporting Data File Formats

### Invoice Asset & Pre-Appointment Liquidated Damages Daily Count Files (MDC/GDC & MFC/GFC)

#### Description:

This file provides a break down by charge band of the number of assets that incurred charges within a geographic area on a specific day within a given billing period.

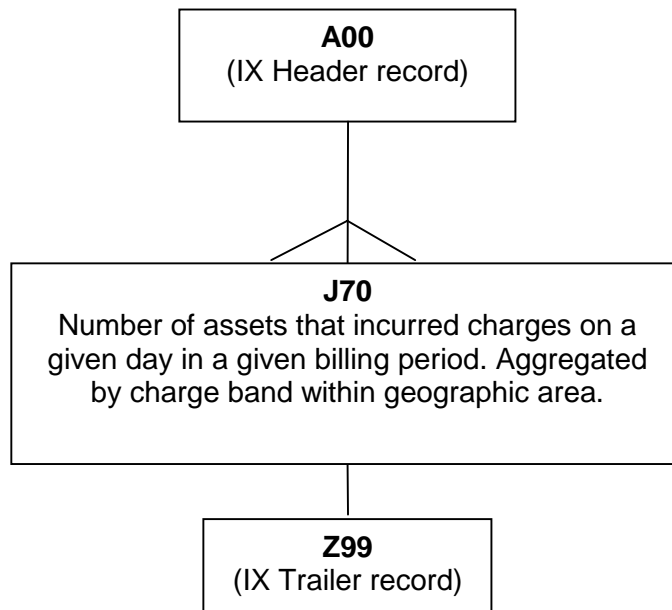

The file will contain 3 different record types: -

Level	Record Name	Occurrences	Optionality
1	hd_a00_standard_header	1	M
1	rt_j70_asset_count_details	up to 25,000	M
1	tr_z99_standard_trailer	1	M

Note 1 OPT Optional, Mandatory.  
DOM Domain i.e. Text, Numeric, Date, Mtimestamp, DEC - Number of decimal places (field lengths are inclusive of decimal places).

Note 2 All numeric values will be positive only unless otherwise specified.

#### File structure diagram – MDC/GDC & MFC/GFC

## Record Layouts

### HD\_A00\_STANDARD\_HEADER

(Standard header for all invoice files sent between MAM and another Organisation)

<u>RECORD/FIELD NAME</u> * OCCURS MAX 1 *	<u>OPT</u>	<u>DOM</u>	<u>LNG</u>	<u>DEC</u>	<u>DESCRIPTION</u>
TRANSACTION_TYPE	M	T	3	0	A code identifying the type of request that this record represents. VALUE: A00
ORGANISATION_ID	M	T	10	0	A reference which uniquely identifies a Customer/Organisation.
FILE_TYPE	M	T	3	0	An application specific code used to identify the structure and the usage of the file. Value 'MDC/GDC' or 'MFC/GFC'.
CREATION_DATE	M	D	8	0	The date on which the file was generated. Format: YYYYMMDD i.e. The date on which the interface program ran.
CREATION_TIME	M	M	6	0	The time at which the file was generated (within the Creation Date). Format: HHMMSS
GENERATION_NUMBER	M	N	6	0	The IX file generation number which represents an issue of the file from the organisation. The MDA/GDA, MDN/GDN, MDC/GDC, , MFN/GDN & MFC/GFC files produced by National Grid Metering will share a range starting at a value of 500,000. Incremented by one for each subsequent file.

\* 36

### RT\_J70\_ASSET\_COUNT\_DETAILS.

(Asset Daily Counts - Detail record)

<u>RECORD/FIELD NAME</u> * OCCURS MAX 25,000 *	<u>OPT</u>	<u>DOM</u>	<u>LNG</u>	<u>DEC</u>	<u>DESCRIPTION</u>
TRANSACTION_TYPE	M	T	3	0	Identifies the type of request this record represents. VALUE: J70
REPORT_DATE	M	D	8	0	The date that the count of assets relates to. Format: YYYYMMDD
GEOGRAPHIC_AREA	M	T	6	0	Outcode based geographic area that the asset count relates to.
CHARGE_ITEM	M	T	1	0	The type of charge that the asset count relates to. (Values are: 'P' – Provision 'I' – Historic Installation 'M' – Maintenance).
CHARGE_BAND	M	T	18	0	The charge band that the asset count relates to. (Charge band being a unique description of a group of assets that all attract the same prices for metering services.

CHARGE_VOLUME_COUNT	M	N	8	0	e.g. PRO DOM CR. The total number of assets that attracted charges on the REPORT_DATE for the CHARGE_BAND within CHARGE_ITEM in GEOGRAPHIC_AREA.
-----					
* 44					

**TR\_Z99\_STANDARD\_TRAILER**

(Standard trailer for all invoice files sent between MAM and another Organisation)

<u>RECORD/FIELD NAME</u> * OCCURS MAX 1 *	<u>OPT</u>	<u>DOM</u>	<u>LNG</u>	<u>DEC</u>	<u>DESCRIPTION</u>
TRANSACTION_TYPE	M	T	3	0	A code identifying the type of request that this record represents. VALUE: Z99
RECORD_COUNT	M	N	10	0	The number of detail records contained within the file. This should not include the Standard Header and Standard Trailer but should include any File Specific Trailers if specified for this file.
-----					
* 13					

**Invoice Asset & Pre-Appointment Liquidated Damages Detail File – Standard Charges (MDN/GDN & MFN/GDN)**

**Description:**

This file provides meter point level detail of standard charges for the provision, maintenance and installation of metering equipment over a given billing period in a geographic area.

**NB.** The current version of this file will only support charge items of P, M and I. Should new charge items be introduced then additional detail fields, similar to those defined for P, M & I, would have to be added to the X03 record.

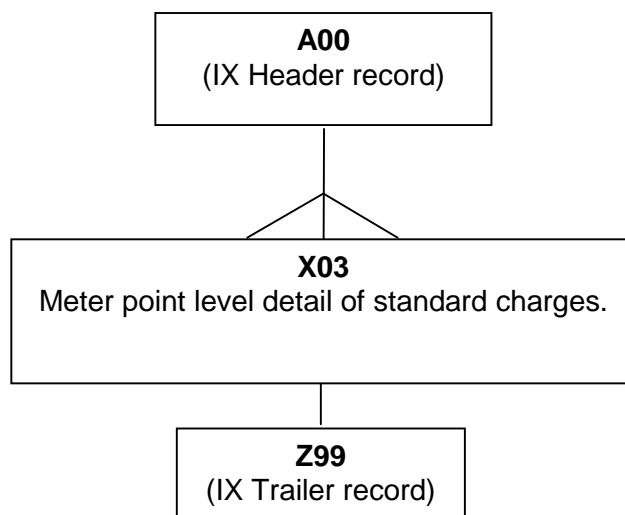

The file will contain 3 different record types: -

Level	Record Name	Occurrences	Optionality
1	hd_a00_standard_header	1	M
2	rt_x03_MPO_standard_charges	up to 3,000,000	M
1	tr_z99_standard_trailer	1	M

Note 1 OPT Optional, Mandatory.  
DOM Domain i.e. Text, Numeric, Date, M timestamp, DEC - Number of decimal places (field lengths are inclusive of decimal places).

Note 2 All numeric values will be positive only unless otherwise specified.

## File structure diagram – MDN/GDN & MFN/GDN

## Record Layouts

### HD\_A00\_STANDARD\_HEADER

(Standard header for all invoice files sent between MAM and another Organisation)

<u>RECORD/FIELD NAME</u>	<u>OPT</u>	<u>DOM</u>	<u>LNG</u>	<u>DEC</u>	<u>DESCRIPTION</u>
* OCCURS MAX 1 *					
TRANSACTION_TYPE	M	T	3	0	A code identifying the type of request that this record represents. VALUE: A00
ORGANISATION_ID	M	T	10	0	A reference which uniquely identifies a Customer/Organisation.
FILE_TYPE	M	T	3	0	An application specific code used to identify the structure and the usage of the file. Value 'MDN/GDN' or 'MFN/GDN'.
CREATION_DATE	M	D	8	0	The date on which the file was generated. Format: YYYYMMDD i.e. The date on which the interface program ran.
CREATION_TIME	M	M	6	0	The time at which the file was generated (within the Creation Date). Format: HHMMSS
GENERATION_NUMBER	M	N	6	0	The IX file generation number which represents an issue of the file from the organisation. The MDN/GDN, MDA/GDA, MDC/GDC, MFN/GDN, & MFC/GFC files produced by National Grid Metering will share a range starting at a value of 500,000. Incremented by one for each subsequent file.

## RT\_X03\_MPO\_STANDARD\_CHARGES.

(Invoice Asset Detail - Invoice detail record)

<u>RECORD/FIELD NAME</u>	<u>OPT</u>	<u>DOM</u>	<u>LNG</u>	<u>DEC</u>	<u>DESCRIPTION</u>
* OCCURS MAX 3,000,000 *					
TRANSACTION_TYPE	M	T	3	0	Identifies the type of request this record represents. VALUE: 'X03'.
MPO_REFERENCE	M	N	10	0	The Meter Point Reference Number.
POSTCODE	M	T	10	0	The meter points' addresses' post code.
EQUIPMENT_NUMBER	M	T	18	0	The metering equipment's serial 'number'.
DEVICE_CATEGORY	M	T	18	0	A unique identifier that is a combination of the manufacturer's short code (first 3 characters) & a reference number that relates to the asset model's attributes (last 4 characters).
PARENT_GENERATION_NUMBER	C	N	6	0	The IX generation number of the invoice file that contains the aggregated charges for this item of metering equipment. This information will not be provided for dataloggers.
AREA_INVOICE_NUMBER	C	N	10	0	The area invoice file that contains the aggregated charges for this item of metering equipment. This information will not be provided for dataloggers.
GEOGRAPHIC_AREA	M	T	6	0	Outcode based geographic area for which the charges have been applied.
CHARGE_APPLIES_FROM_DATE	M	D	8	0	The start date of the period for which the charges apply. Format: YYYYMMDD
CHARGE_APPLIES_TO_DATE	M	D	8	0	The end date of the period for which the charges apply. Format: YYYYMMDD
CHARGE_DAYS	M	N	2	0	The number of days for which the charges have been applied. i.e. The number of days between the FROM_DATE and END_DATE inclusive.
P_CHARGE_ITEM	O	T	1	0	An indicator to denote that the charge details that follow this field are for provision of the asset. Value: 'P'.
P_CHARGE_BAND	O	T	18	0	A unique description for a grouping of assets that all attract the same price for provision. e.g. Pro Dom Cr.
P_LINE_ITEM_NUMBER	O	N	6	0	The line item within the area invoice that includes the charge for the provision of the asset.
P_CHARGE_RATE	O	N	15	4	The gross rate applicable for the provision related charge band.
P_VAT_RATE	O	N	5	2	The VAT rate applicable to the provision related charge band.

P_AMOUNT_DUE	O	N	15	6	The amount charged for the provision of the charge item. (VAT exclusive) Note: Value to 6 decimal places in order to avoid rounding issues as invoice values are aggregated.
P_VAT_AMOUNT_DUE	O	N	16	8	The amount of VAT charged against the P_AMOUNT_DUE. Note: Value to 8 decimal places in order to avoid rounding issues as invoice values are aggregated.
M_CHARGE_ITEM	O	T	1	0	An indicator to denote that the charge details that follow this field are for maintenance of the asset. Value: 'M'.
M_CHARGE_BAND	O	T	18	0	A unique description for a grouping of assets that all attract the same price for maintenance. e.g. Mnt Dom Cr.
M_LINE_ITEM_NUMBER	O	N	6	0	The line item within the area invoice that includes the charge for maintenance of the asset.
M_CHARGE_RATE	O	N	15	4	The gross rate applicable for maintenance related charge band.
M_VAT_RATE	O	N	5	2	The VAT rate applicable to the maintenance related charge band.
M_AMOUNT_DUE	O	N	15	6	The amount charged for the maintenance of the charge item. (VAT exclusive) Note: Value to 6 decimal places in order to avoid rounding issues as invoice values are aggregated.
M_VAT_AMOUNT_DUE	O	N	16	8	The amount of VAT charged against the M_AMOUNT_DUE. Note: Value to 8 decimal places in order to avoid rounding issues as invoice values are aggregated.
I_CHARGE_ITEM	O	T	1	0	An indicator to denote that the charge details that follow this field are for installation of the asset. Value: 'I'.
I_CHARGE_BAND	O	T	18	0	A unique description for a grouping of assets that all attract the same price for installation. e.g. Ins Dom Cr.
I_LINE_ITEM_NUMBER	O	N	6	0	The line item within the area invoice that includes the charge for installation of the asset.
I_CHARGE_RATE	O	N	15	4	The gross rate applicable for the installation related charge band.
I_VAT_RATE	O	N	5	2	The VAT rate applicable to the installation related charge band.
I_AMOUNT_DUE	O	N	15	6	The amount charged for the installation of the charge item. (VAT exclusive) Note: Value to 6 decimal places in order to avoid rounding issues as invoice values are aggregated.
I_VAT_AMOUNT_DUE	O	N	16	8	The amount of VAT charged against the I_AMOUNT_DUE. Note: Value to 8 decimal places in order to avoid rounding issues as invoice values are aggregated.

**TR\_Z99\_STANDARD\_TRAILER**

(Standard trailer for all invoice files sent between MAM and another Organisation)

<u>RECORD/FIELD NAME</u>	<u>OPT</u>	<u>DOM</u>	<u>LNG</u>	<u>DEC</u>	<u>DESCRIPTION</u>
* OCCURS MAX 1 *					
TRANSACTION_TYPE	M	T	3	0	A code identifying the type of request that this record represents. VALUE : Z99
RECORD_COUNT	M	N	10	0	The number of detail records contained within the file. This should not include the Standard Header and Standard Trailer but should include any File Specific Trailers if specified for this file.
-----					
* 13					

**Invoice Asset Detail Files – Adjustments (MDA/GDA)**

**Description:**

This file provides meter point level detail of adjustments to charges for the provision, maintenance and installation of metering equipment over a given billing period in a geographic area.

**NB.** The current version of this file will only support charge items of P, M and I. Should new charge items be introduced then additional detail fields, similar to those defined for P, M & I, would have to be added to the X04 record.

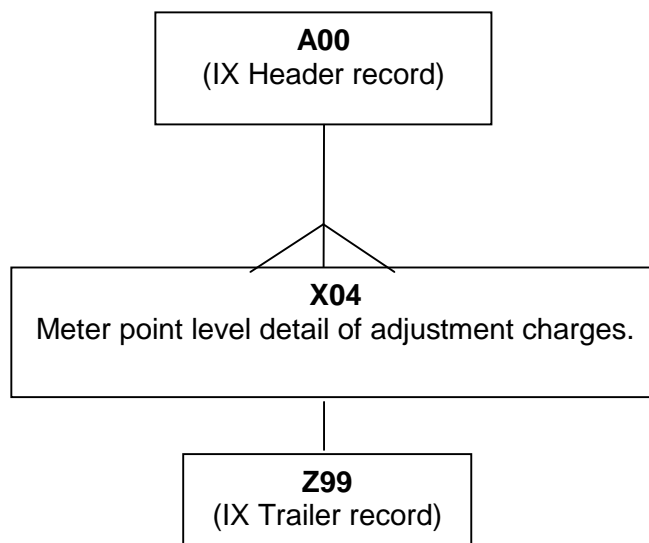

The file will contain 3 different record types: -

Level	Record Name	Occurrences	Optionality
1	hd_a00_standard_header	1	M
2	rt_x04_MPO_adjustment_charges	up to 6,000,000	M
1	tr_z99_standard_trailer	1	M

Note 1 OPT Optional, Mandatory.  
 DOM Domain i.e. Text, Numeric, Date, Mtimestamp, DEC - Number of decimal places (field lengths are inclusive of decimal places).

Note 2 All numeric values will be positive only unless otherwise specified.

### RT\_X04\_MPO\_ADJUSTMENT\_CHARGES.

(Invoice Asset Detail – Adjustment Detail Record)

<u>RECORD/FIELD NAME</u>	<u>OPT</u>	<u>DOM</u>	<u>LNG</u>	<u>DEC</u>	<u>DESCRIPTION</u>
* OCCURS MAX 6,000,000 *					
TRANSACTION_TYPE	M	T	3	0	Identifies the type of request this record represents. VALUE: 'X04'.
MPO_REFERENCE	M	N	10	0	The Meter Point Reference Number.
POSTCODE	M	T	10	0	The meter points' addresses' post code.
EQUIPMENT_NUMBER	M	T	18	0	The metering equipment's serial number.
DEVICE_CATEGORY	M	T	18	0	A unique identifier that is a combination of the manufacturer's short code (first 3 characters) & a reference number that relates to the asset model's attributes (last 4 characters).
PARENT_GENERATION_NUMBER	C	N	6	0	The IX generation number of the invoice file that contains the aggregated adjustment charges detailed in this record for this item of metering equipment. This information will not be provided for dataloggers.
AREA_INVOICE_NUMBER	C	N	10	0	The area invoice file that contains the aggregated adjustment charges detailed in this record. This information will not be provided for dataloggers.
ADJUSTMENT_FROM_DATE	M	D	8	0	The start date of the period for which the adjustment charges apply. Format: YYYYMMDD
ADJUSTMENT_TO_DATE	M	D	8	0	The end date of the period for which the adjustment charges apply. Format: YYYYMMDD
CHARGE_DAYS	O	N	2	0	The number of days for which the adjustment charges have been applied. i.e. The number of days between ADJUSTMENT_FROM_DATE and ADJUSTMENT_END_DATE inclusive.
GEOGRAPHIC_AREA	M	T	6	0	Outcode based geographic area for which the adjustment charges have been applied.
ORIGINAL_GENERATION_NUMBER	O	N	6	0	The IX generation number of the invoice file that contained the original aggregated charges for this item of metering equipment.
ORIGINAL_AREA_INVOICE_NUMBER	O	N	10	0	The area invoice file that contained the original aggregated charges for this item of metering equipment.
PO_CHARGE_ITEM	O	T	1	0	When present (i.e. value 'P') denotes that the next 6 fields in the record will be populated with details of the original invoiced provision charges.
PO_CHARGE_BAND	O	T	18	0	The charge band that the original charges for provision were attributed to.
PO_LINE_ITEM_NUMBER	O	N	6	0	The line item within the area invoice that included the original charge for provision.
PO_CHARGE_RATE	O	N	15	4	The original gross rate (VAT exclusive) that was applicable for

						the original provision related charge band.
PO_VAT_RATE	O	N	5	2		The original VAT rate that was applicable to the original provision related charge band.
PO_AMOUNT_DUE	O	N	15	6		The original amount due for the provision charge item. (VAT exclusive) Note: Value to 6 decimal places in order to avoid rounding issues as invoice values are aggregated.
PO_VAT_AMOUNT_DUE	O	N	16	8		The original amount of VAT charged against the PO_AMOUNT_DUE. Note: Value to 8 decimal places in order to avoid rounding issues as invoice values are aggregated.
PR_CHARGE_ITEM	O	T	1	0		When present (i.e. value 'P') denotes that the next 6 fields in the record will be populated with details of the revised provision charges.
PR_CHARGE_BAND	O	T	18	0		The charge band that the revised charges for provision are attributed to.
PR_LINE_ITEM_NUMBER	O	N	6	0		The line item within the area invoice that includes the revised charge for provision.
PR_CHARGE_RATE	O	N	15	4		The revised gross rate (VAT exclusive) that is applicable for the revised provision related charge band.
PR_VAT_RATE	O	N	5	2		The revised VAT rate that is applicable to the revised provision related charge band.
PR_AMOUNT_DUE	O	N	15	6		The revised amount due for the provision charge item. (VAT exclusive) Note: Value to 6 decimal places in order to avoid rounding issues as invoice values are aggregated.
PR_VAT_AMOUNT_DUE	O	N	16	8		The revised amount of VAT charged against the PR_AMOUNT_DUE. Note: Value to 8 decimal places in order to avoid rounding issues as invoice values are aggregated.
MO_CHARGE_ITEM	O	T	1	0		When present (i.e. value 'M') denotes that the next 6 fields in the record will be populated with details of the original invoiced maintenance charges.
MO_CHARGE_BAND	O	T	18	0		The charge band that the original charges for maintenance were attributed to.
MO_LINE_ITEM_NUMBER	O	N	6	0		The line item within the area invoice that included the original charge for maintenance.
MO_CHARGE_RATE	O	N	15	4		The original gross rate (VAT exclusive) that was applicable for the original maintenance related charge band.
MO_VAT_RATE	O	N	5	2		The original VAT rate that was applicable to the original maintenance related charge band.

MO_AMOUNT_DUE	O	N	15	6	The original amount due for the maintenance charge item. (VAT exclusive) Note: Value to 6 decimal places in order to avoid rounding issues as invoice values are aggregated.
MO_VAT_AMOUNT_DUE	O	N	16	8	The original amount of VAT charged against the MO_AMOUNT_DUE. Note: Value to 8 decimal places in order to avoid rounding issues as invoice values are aggregated.
MR_CHARGE_ITEM	O	T	1	0	When present (i.e. value 'M') denotes that the next 6 fields in the record will be populated with details of the revised maintenance charges.
MR_CHARGE_BAND	O	T	18	0	The charge band that the revised charges for maintenance are attributed to.
MR_LINE_ITEM_NUMBER	O	N	6	0	The line item within the area invoice that includes the revised charge for maintenance.
MR_CHARGE_RATE	O	N	15	4	The revised gross rate (VAT exclusive) that is applicable for the revised maintenance related charge band.
MR_VAT_RATE	O	N	5	2	The revised VAT rate that is applicable to the revised maintenance related charge band.
MR_AMOUNT_DUE	O	N	15	6	The revised amount due for the maintenance charge item. (VAT exclusive) Note: Value to 6 decimal places in order to avoid rounding issues as invoice values are aggregated.
MR_VAT_AMOUNT_DUE	O	N	16	8	The revised amount of VAT charged against the MR_AMOUNT_DUE. Note: Value to 8 decimal places in order to avoid rounding issues as invoice values are aggregated.
IO_CHARGE_ITEM	O	T	1	0	When present (i.e. value 'I') denotes that the next 6 fields in the record will be populated with details of the original invoiced installation charges.
IO_CHARGE_BAND	O	T	18	0	The charge band that the original charges for installation were attributed to.
IO_LINE_ITEM_NUMBER	O	N	6	0	The line item within the area invoice that included the original charge for installation.
IO_CHARGE_RATE	O	N	15	4	The original gross rate (VAT exclusive) that was applicable for the original installation related charge band.
IO_VAT_RATE	O	N	5	2	The original VAT rate that was applicable to the original installation related charge band.
IO_AMOUNT_DUE	O	N	15	6	The original amount due for the installation item. (VAT exclusive) Note: Value to 6 decimal places in order to avoid rounding issues as invoice values are aggregated.
IO_VAT_AMOUNT_DUE	O	N	16	8	The original amount of VAT charged against the IO_AMOUNT_DUE.

FIELD NAME	OPT	DOM	LNG	DEC	DESCRIPTION
IR_CHARGE_ITEM	O	T	1	0	Note: Value to 8 decimal places in order to avoid rounding issues as invoice values are aggregated. When present (i.e. value '1') denotes that the next 6 fields in the record will be populated with details of the revised installation charges.
IR_CHARGE_BAND	O	T	18	0	The charge band that the revised charges for installation are attributed to.
IR_LINE_ITEM_NUMBER	O	N	6	0	The line item within the area invoice that includes the revised charge for installation.
IR_CHARGE_RATE	O	N	15	4	The revised gross rate (VAT exclusive) that is applicable for the revised installation related charge band.
IR_VAT_RATE	O	N	5	2	The revised VAT rate that is applicable to the revised installation related charge band.
IR_AMOUNT_DUE	O	N	15	6	The revised amount due for the installation charge item. (VAT exclusive) Note: Value to 6 decimal places in order to avoid rounding issues as invoice values are aggregated.
IR_VAT_AMOUNT_DUE	O	N	16	8	The revised amount of VAT charged against the IR_AMOUNT_DUE. Note: Value to 8 decimal places in order to avoid rounding issues as invoice values are aggregated.

### 3.3 National Grid Metering Data Dictionary

The following table contains Data Dictionary information for National Grid Domain Data for the following File Formats.

- Metering Assets Invoice, Metering Asset Standard Adjustments Invoice and Pre Appointment Liquidated Damages (PALD) Invoice
- Asset Works Invoice & Asset Works Ad Hoc Adjustment Invoice
- Query Submission (OSENQ)
- Query Response (RSENQ)
- Query Notification – Progress, Resolution & Completion (ONENQ)

The attributes described in the following table are not defined within the existing RGMA Data Dictionary.

### 3.4 Data Dictionary

The table below provides meter data for those attributes listed in the previous sections and which are not defined within existing ITSG documentation.

DATASET NAME	DATASET DESCRIPTION							NOTES
Attribute Reference	Prim Key	Attribute Name	Opt	Format	Length Dec	PI	Domain	Description
<b>Market Participant</b>								
<b>T0300</b>		<b>VAT Registration Number</b>	<b>N</b>	<b>Integer</b>	<b>9</b>			<b>A number issued to all companies where the turnover exceeds a Government limit or who have registered voluntarily, against which Value Added Tax is paid. The first 3 digits of the number indicate the original issuing tax office</b>
<b>Bank Account</b>								
<b>T0302</b>	<b>*</b>	<b>Sort Code</b>	<b>N</b>	<b>Integer</b>	<b>6</b>			<b>The Sort Code of the bank branch at which the account is held</b>
<b>T0303</b>	<b>*</b>	<b>Account Code</b>	<b>N</b>	<b>Integer</b>	<b>8</b>			<b>The account number of the bank account</b>
<b>T0304</b>		<b>Account Name</b>	<b>Y</b>	<b>Text</b>	<b>30</b>			<b>The name under which the bank account is registered by the bank</b>
<b>Invoice Summary</b>								
<b>T0306</b>		<b>Billing Period Start Date</b>	<b>N</b>	<b>Date</b>	<b>8</b>		<b>Date</b>	<b>A summary of the monetary amounts detailed on the invoice</b> <b>The start of the period for which the invoice applies.</b>
								<b>Format YYYYMMDD</b> <b>e.g. 20020401</b>

DATASET NAME		DATASET DESCRIPTION						NOTES
Attribute Reference	Prim Key	Attribute Name	Opt	Format	Length Dec Pl	Domain	Description	
T0307		Billing Period End Date	N	Date	8	Date	The end of the period for which the invoice applies	Format YYYYMMDD e.g. 20020430
T0308		Payment Terms And Contract Text Part One	N	Text	200		Descriptive text relating to the contract and/or its payment terms	
T0309		Payment Terms And Contract Text Part Two	Y	Text	200		Further Descriptive text relating to the contract and/or its payment terms	
T0310		Tax Point Date	N	Date	8	Date	Holds the date from which the invoice can be taxed. In practice, this will be the date on which the invoice was sent to the National Grid Metering Customer	Format YYYYMMDD e.g. 20020503
T0311		Debit Amount	N	Number	15,2	Monetary Amount	Holds the sum of debit amounts due for all debit invoice items (i.e. DEBIT_AMOUNT values in the dataset's associated Geographic Area Summary datasets) on the invoice. (Exclusive of VAT).	
T0312		Debit VAT Amount	N	Number	15,2	Monetary Amount	Holds the sum of all VAT amounts due for all debit invoice items (i.e. DEBIT_VAT_AMOUNT values in the dataset's associated Geographic Area Summary datasets) on the invoice.	
T0313		Debit Total Amount	N	Number	15,2	Monetary Amount	Holds sum of DEBIT_AMOUNT and DEBIT_VAT_AMOUNT for all debit invoice items on the invoice. (Inclusive of VAT)	
T0314		Credit Amount	N	Number	15,2	Monetary Amount	MAV/IAV, MFV/IFV & AWI/IWIAWI/IWI/IWI files – Always zero. MAJ/IAJ, MAH/IAH & AWH/IWH files: - Holds the sum of credit amounts due for all credit invoice items (i.e. CREDIT_AMOUNT_DUE values in the dataset's associated Geographic Area Summary datasets) on the invoice. (Exclusive of VAT).	Can be negative.
T0315		Credit VAT Amount	N	Number	15,2	Monetary Amount	MAV/IAV, MFV/IFV & AWI/IWIAWI/IWI/IWI files – Always zero. MAJ/IAJ, MAH/IAH & AWH/IWH files: - Holds the sum of all VAT amounts due for all credit invoice items (i.e. CREDIT_AMOUNT_DUE values in the dataset's associated Geographic Area Summary datasets) on the invoice. (Exclusive of VAT).	Can be negative.
T0316		Credit Total Amount	N	Number	15,2	Monetary Amount	Holds sum of CREDIT_AMOUNT and CREDIT_VAT_AMOUNT for all credit invoice items on the invoice.	Can be negative.

DATASET NAME		DATASET DESCRIPTION						NOTES
Attribute Reference	Prim Key	Attribute Name	Opt	Format	Length Dec Pl	Domain	Description	
<b>T0317</b>		<b>VAT Charged To National Grid Metering</b>	<b>N</b>	<b>Number</b>	<b>15,2</b>	<b>Monetary Amount</b>	<b>Holds the sum of the Invoice Item VAT amounts charged to National Grid Metering. i.e. The net value of DEBIT_VAT_AMOUNT and CREDIT_VAT_AMOUNT</b>	<b>Can be negative.</b>
VAT Rate Summary							<b>A summary of the VAT amounts detailed on the invoice</b>	
<b>T0319</b>		<b>VAT Rate</b>	<b>N</b>	<b>Number</b>	<b>5,2</b>		<b>The rate at which VAT is applied to goods or services</b>	
<b>T0320</b>		<b>Debit Amount</b>	<b>N</b>	<b>Number</b>	<b>15,2</b>	<b>Monetary Amount</b>	<b>Holds sum of debit amount due for all debit invoice items on the invoice that are subject to the given VAT Rate (Exclusive of VAT).</b>	
<b>T0321</b>		<b>Debit VAT Amount</b>	<b>N</b>	<b>Number</b>	<b>15,2</b>	<b>Monetary Amount</b>	<b>Holds sum of all VAT amounts due for all debit invoice items on the invoice that are subject to the given VAT Rate.</b>	
<b>T0322</b>		<b>Debit Total Amount</b>	<b>N</b>	<b>Number</b>	<b>15,2</b>	<b>Monetary Amount</b>	<b>Holds sum of DEBIT_AMOUNT and DEBIT_VAT_AMOUNT for all debit invoice items on the invoice that are subject to the given VAT Rate (Inclusive of VAT)</b>	
<b>T0323</b>		<b>Credit Amount</b>	<b>N</b>	<b>Number</b>	<b>15,2</b>	<b>Monetary Amount</b>	<b>Holds sum of credit amounts due for all credit invoice items on the invoice that are subject to the given VAT Rate (Exclusive of VAT).</b>	<b>Can be negative.</b>
<b>T0324</b>		<b>Credit VAT Amount</b>	<b>N</b>	<b>Number</b>	<b>15,2</b>	<b>Monetary Amount</b>	<b>Holds sum of all VAT amounts due for all credit invoice items on the invoice that are subject to the given VAT Rate.</b>	<b>Can be negative.</b>
<b>T0325</b>		<b>Credit Total Amount</b>	<b>N</b>	<b>Number</b>	<b>15,2</b>	<b>Monetary Amount</b>	<b>Holds sum of CREDIT_AMOUNT and CREDIT_VAT_AMOUNT for all credit invoice items on the invoice that are subject to the given VAT Rate</b>	<b>Can be negative.</b>
<b>T0326</b>		<b>Charged To National Grid Metering</b>	<b>N</b>	<b>Number</b>	<b>15,2</b>	<b>Monetary Amount</b>	<b>Holds the sum of the Invoice Item VAT amounts charged to National Grid Metering that are subject to the given VAT rate. i.e. The net value of DEBIT_VAT_AMOUNT and CREDIT_VAT_AMOUNT</b>	<b>Can be negative.</b>
Geographic Area Summary							<b>A summary of the monetary amounts for a specific (postcode outcode based) Geographic Area detailed on the invoice.</b>	
<b>T0328</b>		<b>Geographic Area</b>	<b>N</b>	<b>Text</b>	<b>6</b>		<b>Outcode based geographic area</b>	
<b>T0329</b>		<b>Geographic Area Invoice Reference</b>	<b>N</b>	<b>Number</b>	<b>10</b>		<b>A number uniquely identifying a Geographic Area invoice.</b>
