

GAZPROM Response sent via email.

Hi Colin

Apologies we have received a delivery failure notice for our response submitted on Friday

Whilst we do not support either proposal we would prefer Option 2 as the least worst option.

However we would like to highlight our concerns over the proposed implementation date of April 2016.

This provides less than 8 months' notice of a significant material changes to consumers charges and contracts. To avoid additional unnecessary disruption to consumers / suppliers we would prefer to see implementation aligned with the start of the Gas / Contract Year and therefore prefer implementation to be aligned with the 1st October.

Regards

Steve
