Dear Andrew

Greenpark Energy Ltd Response to Adhoc Revision of Incremental Entry Capacity Release Methodology Statement October 2009

Greenpark Energy Ltd (Greenpark) welcomes the opportunity to comment on National Grid's proposed changes to the Incremental Entry Capacity Release Statement.

Greenpark agrees with National Grid that the current minimum incremental step size for new Aggregate System Entry Points (ASEPs) of 15 GWh/d can act as a barrier to the development of smaller new ASEPs on the system. Additionally, it can also prevent the shippers and developers of such sites from being able to provide National Grid with an appropriate investment signal and therefore Greenpark welcomes the proposed reduction from the current 15 GWh/d to 5 GWh/d.

I hope the above is useful. Should you have any queries please contact me at the address above.

Yours faithfully

Graham White
Operations Manager
