Dear Andrew,

**RE: Consultation on “The Entry Capacity Transfer and Trade Methodology Statement”.**

Thank you for the opportunity to comment on the proposed revisions to the above mentioned methodology statement.

It is evident from reading the document, and indeed from discussions at Transmission workstream, that National Grid proposes to leave the methodology essentially unchanged other than minor textual changes within the document. We agree that the Trade and Transfer process has appeared to work effectively under the current methodology, and therefore believe that it is fit for purpose and should remain unaltered for the time being.

Please contact me if you would like to discuss this response

Yours sincerely,

Chris Wright  
**Commercial Manager**
