Dear Steve

**The Statement and Methodology of the Gas Transmission Connection Charging –  
1st April 2010**

On 17 June 2010, NGG submitted the updated Statement and Methodology for Gas Transmission Connection Charging (the Statement) to the Authority pursuant to paragraphs 3, 4 and 9 of standard condition 4B of National Grid Gas's (NGG's) gas transporter licence.

The covering letter with the submission states that only minor changes have been made to the revised Statement. These changes include the addition of indicative connection cost examples, revisions to various definitions in Annex A, and text revisions to improve the clarity of the Statement.

We acknowledge receipt of the Statement and Methodology for Gas Transmission Connection Charging, pursuant to paragraphs 4 and 9 of standard condition 4B, and note the revisions made to it. We are content for NGG to publish the document as outlined in the letter of 17 June 2010.

Yours sincerely

Stuart Cook  
**Senior Partner, Transmission & Governance**

**Signed on behalf of the Authority and authorised for that purpose.**
