# MIPI Changes
# 11th July 2012

# Background

- NTS Exit Capacity regime moves from the "Transitional" to the "Enduring" period on 1st October 2012

- New data items and reports are being added to MIPI in line with this change

- Some current data items and reports are being re-named or discontinued

**Note: This menu has been renamed from** *'Exit Capacity Application Publications'*

# ENTSOG

national**grid**
THE POWER OF ACTION

New Exit data sent from **MIPI** to **ENTSOG** Transparency Platform including:

- Interconnector & Storage Exit Point Data

- Long Term Firm Capacity

- Scaleback Restoration

- Tariff Data

Link to the ENTSOG platform:  www.gas-roads.eu

# Price Data

Some additional non-obligated data items are included as they are considered to be consistent with Entry Capacity.

These include:

- Day-Ahead, Within-Day and Off-Peak Price data

- Max/Min Prices

- Weighted Average prices (WAP)

# Timeframe

- **7th – 14th September 2012:** Menu structures  to be implemented

- **1st October 2012:** Capacity Exit data will go live and new menu structure will be available to use

- More detailed information on the new data items and lists will be published via the National Grid Operational data page prior to implementation
