# MIPI Performance
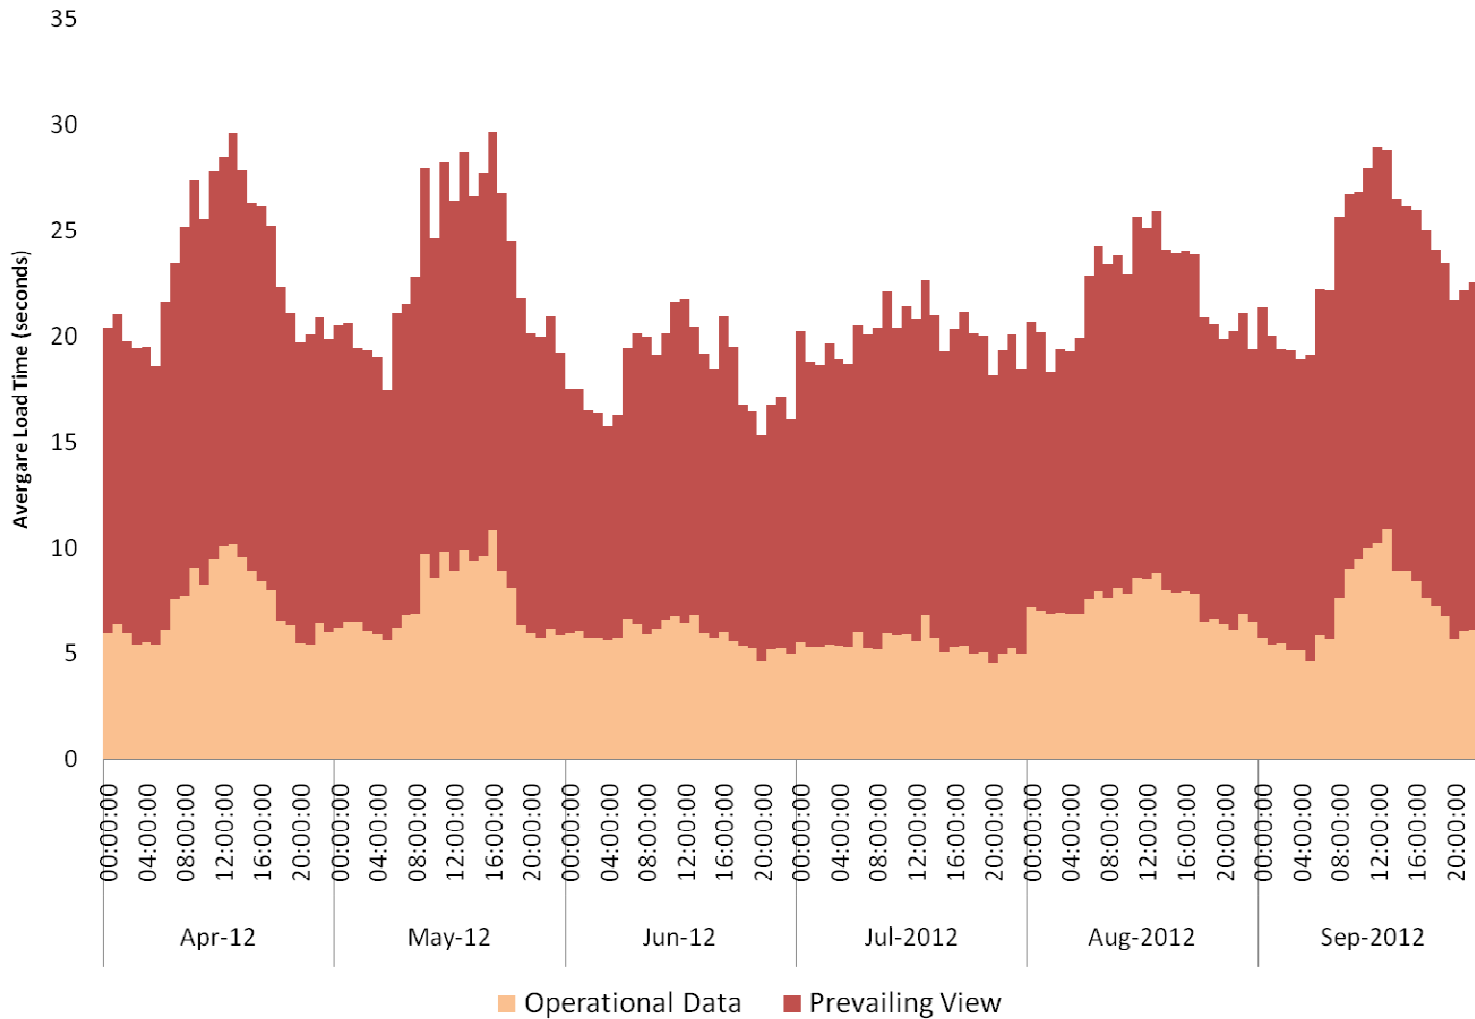

17th October 2012

MIPI Performance – Monthly Hit Count
## (all MIPI)

MIPI Performance – Average Load Times

MIPI Performance – Usage Load factors

- Load factors (number of requests received / volume of data downloaded) have a significant impact on MIPI speeds and performance

- Current loads remain in excess of system specification

- A relatively small number of users had been the source of a disproportionate site load

- Contact has now been made directly with many of these users

- Tools enabling the enhanced monitoring of MIPI site usage have now been made available to our analytical teams

Market Information – Data Acquisition Reductions

nationalgrid

'Market Information' Hits & Data Download (17/09 to 15/10)

Legend:
- Sum of Site Hits - Top 20 Users
- Sum of Site Hits - All Other Users
- Sum of GB Downloaded - Top 20 Users
- Sum of GB Downloaded - All Other Users
