

The Enduring NTS Exit Capacity Regime

17th October 2012

Go Live - Summary

- Exit Reform is the biggest commercial change to impact the operation of the Gas Transmission system in the last 5 years and the full Regime went live on 1st October 2012
- Considering the size & complexity NG view is that the implementation of Exit was a success albeit with some snagging issues
- Your views?

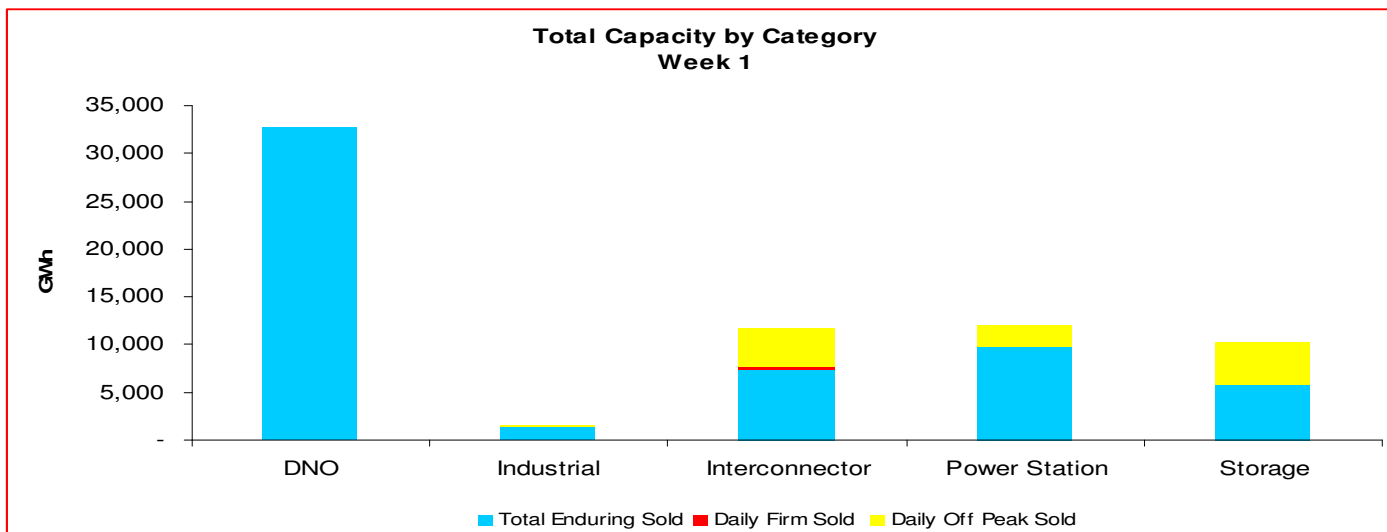

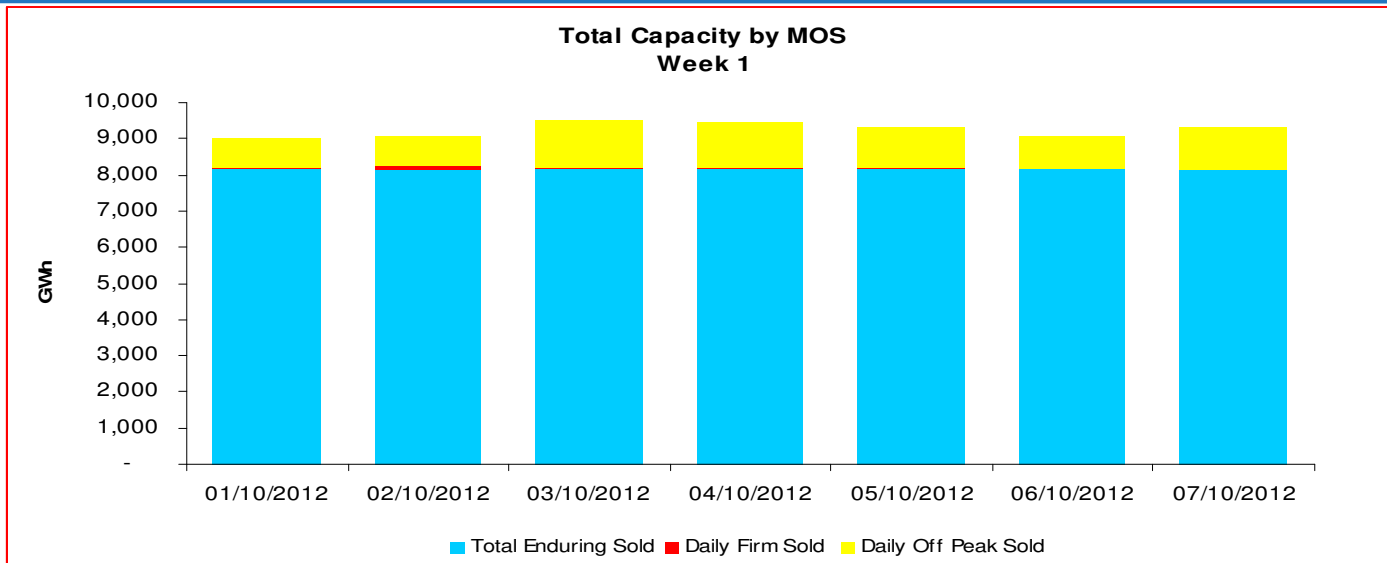

Go Live – snagging list

Topic	Resolution/action
UIOLI calculation for release of Offpeak requires 30 days of Firm Exit Capacity usage data up to D-7 for Off-peak Capacity release	Transitional process in place (until 7 th November) to release discretionary Off-peak capacity to meet User needs where possible
Entry of bids for Daily Exit Products takes longer than expected	This is something we're looking at and we'll keep you informed
Issue encountered with DADNEX allocation 14/10/12	Technical timing issue – now resolved
OPN files not processed due to: <ol style="list-style-type: none">1. Zero values contained2. When 1 file fails subsequent ones 'back up'	Files amended such that zero values are not provided for CVs & pressures Analysis ongoing to determine full resolution for item 2

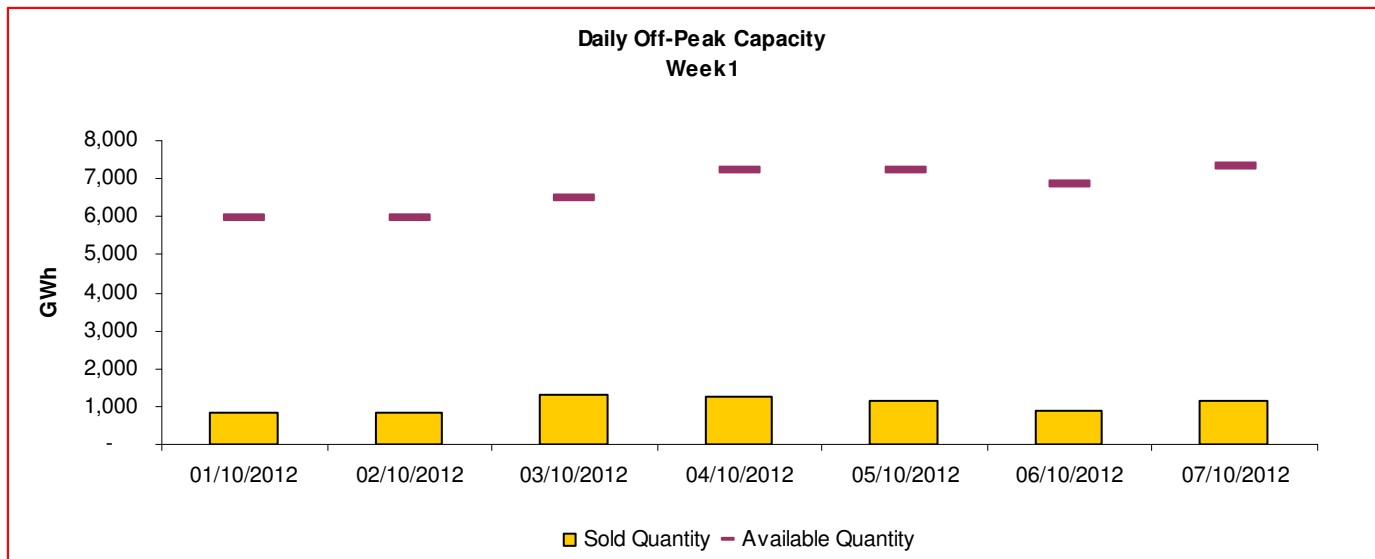

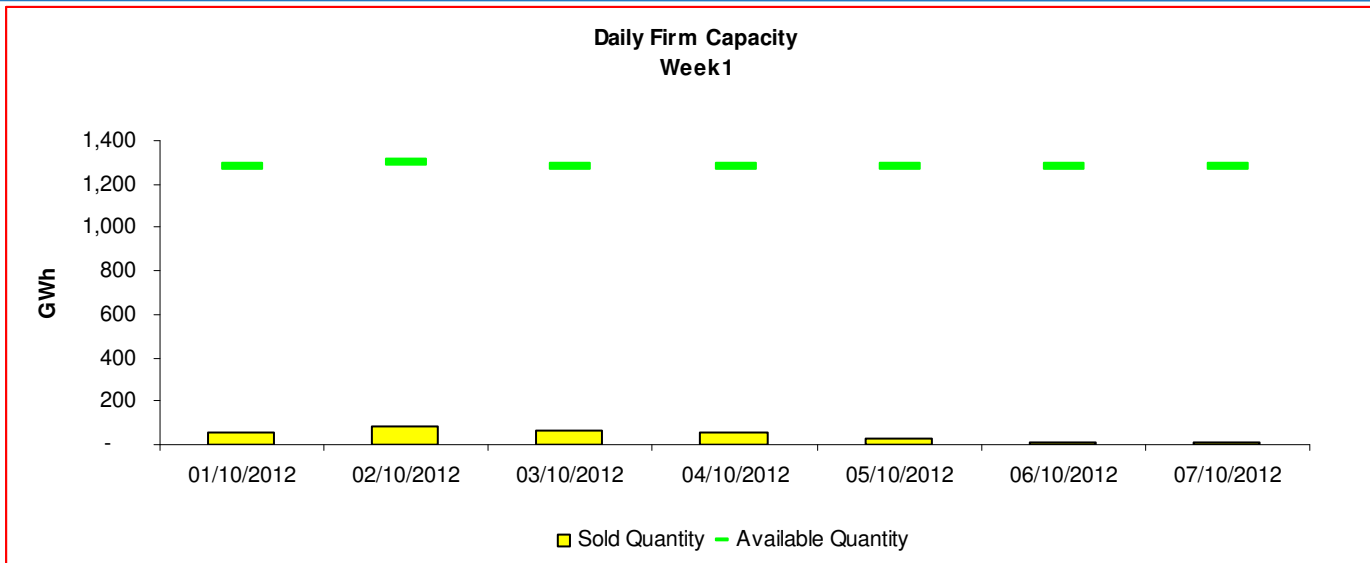

Go Live – snagging list

Topic	Resolution/action
Some confusion surrounding the transitioning of Interruptible sites to Firm	Additional communications provided Lessons learnt should there be any similar activity going forward
There were some issues with Entry Auctions for Gas Day 01/10/12 (unrelated to Exit Implementation)	Technical issue Daily auctions now running Long term fix to ensure this doesn't happen at the next month end is in progress & we'll keep you informed Some minimal data cleansing necessary
