15th December 2006

Dear Dominic,

Response to Gas Transmission Transportation Charging Methodology Consultation Document NTS GCM02: DN Pensions Deficit Charge

This response is on behalf of National Grid's distribution business.

We support the approach proposed by National Grid NTS in the consultation paper. We agree that it is appropriate that there should be a fixed monthly charge which should be set such that the revenue is recovered within the formula year to which it relates.

Yours sincerely,

Steve Armstrong
