

Grain North Powerstation zero baseline point notice 15/06/20

Mon 15/06/2020 12:10
ENA Regulation <regulation@energynetworks.org>
EXT || New NTS Exit Point

To ENA Regulation

Dear Industry Colleague,

Please note, the following message has been sent on behalf of National Grid Gas Transmission:

In accordance with our Gas Transporter Licence Special Condition 5G: Part F, a new NTS Exit point as detailed below has been added to the Zero Licence Baseline Exit Capacity Table.

This table can be found on the Long Term summary report here:

Exit Report: <http://mip-prod-web.azurewebsites.net/ExitCapacityPublication/Index> (Publication Type: Long Term Summary)

Site	Exit
Type	DC
	Grain
Site	North
Name	Power
	Station
Baseline	0

Please note that a consultation under EU regulations regarding Relevant Point classification for this new point will commence in future under a separate notice as required.

If you have any questions regarding the above, please contact Nicola Lond at Nicola.j.lond@nationalgrid.com
