Introduction

Background information

This short guide is to help our customers, (specifically NTS Users and/or Developers) who have entered into a Planning and Advanced Reservation of Capacity Agreement (PARCA), understand PARCA 'variations'.

For background, a PARCA is a multi-phased bilateral contract between National Grid and a customer which allows firm Quarterly System Entry Capacity and/or firm Enduring Annual NTS Exit (flat) Capacity to be reserved for the customer while they develop initial phases of their own project.

After system capacity is Reserved, pursuant to a PARCA, a customer may wish to change certain aspects of the Reserved Capacity and can apply to do so by submitting a 'variation request' to National Grid.

The guide should be read alongside the Planning and Advanced Reservation Capacity Agreement (PARCA) – a guide for customers available on our website and updated October 2018.

<https://www.nationalgridgas.com/connections/reserving-capacity-parca-and-cam>

This guide does not cover the termination of a PARCA, but further information on terminations can be found in the same PARCA guide for customers.

The rules and process relating to NTS Capacity and PARCA are contained with the Uniform Network Code (UNC) – Transportation Principal Document (TPD) Section B, System Use and Capacity B1.14 to B1.18.

Gas Transmission Capacity Guidelines – a customer guide contains information on the entry and exit capacity processes.

Implementation of fees

With effect from 17th January 2021, new PARCA Variation fees have been introduced.

These fees were subject to an industry consultation during November 2020. This consultation can be found on our website here

PARCA Variations– FAQs

PARCA Variation

A request to change an existing Planning and Reservation of Capacity (PARCA) contract.

What is a PARCA Variation?

A PARCA variation is a request to change an existing Planning and Advance Reservation of Capacity (PARCA) contract.

We understand that things can change as projects progress.

Within PARCA Phase 2, a request (a 'variation request') can be made to vary the Registration Date, Location and/or Reserved Capacity quantity. Whilst variations are not defined within UNC, we will endeavour to accommodate such changes in accordance with the terms of the PARCA.

We will keep industry notices update on our website to reflect any changes. They can be found under PARCA notices.

<https://www.nationalgrid.com/uk/gas-transmission/connections/reserving-capacity-parca-and-cam>

What are the fees?

Following analysis of recent PARCA Variation costs we have introduced PARCA Application variation fees with effect from 17th January 2021, following consultation.

There are different fees depending upon the request.

A requested change to capacity quantity/location/earlier Registration Date requires differing analysis. The range of analysis and therefore cost associated will depend on the request. All fees will be reconciled to actual cost.

The fees are published within the current Statement for Gas Transmission Charging which can be found on our website.

<https://www.nationalgrid.com/uk/gas-transmission/connections/applying-connection>

When and how do I request one?

The customer that holds the PARCA contract, can request to National Grid in writing that they wish to make a change to their contract. It is good practice to

first discuss this with your National Grid Contract Manager. If you are not sure who to contact, please see the Contact Us section at the end of this guide.

On receipt of a request we will discuss this with the customer and indicate the appropriate fees and process required depending on the nature of the request.

It is best to give at least 4 months' notice to allow time for the required analysis.

The PARCA contract provides the terms by which you can change your contract. Changes outside of this can be requested and considered but not guaranteed.

Contact Us

If you are considering a variation to your PARCA or require further information regarding PARCAs after reading this document, please visit our website for further information at
