Licence Change for new points

National Grid made a proposal to Ofgem to update our Licence to change the process for adding new points. The purpose is to **simplify and make quicker**, the process of adding new points which have no associated capacity baseline obligations.

Following statutory consultation, Ofgem published their decision for implementation with effect from **10th December 2019**.

Licence Change summary

Licence Change:

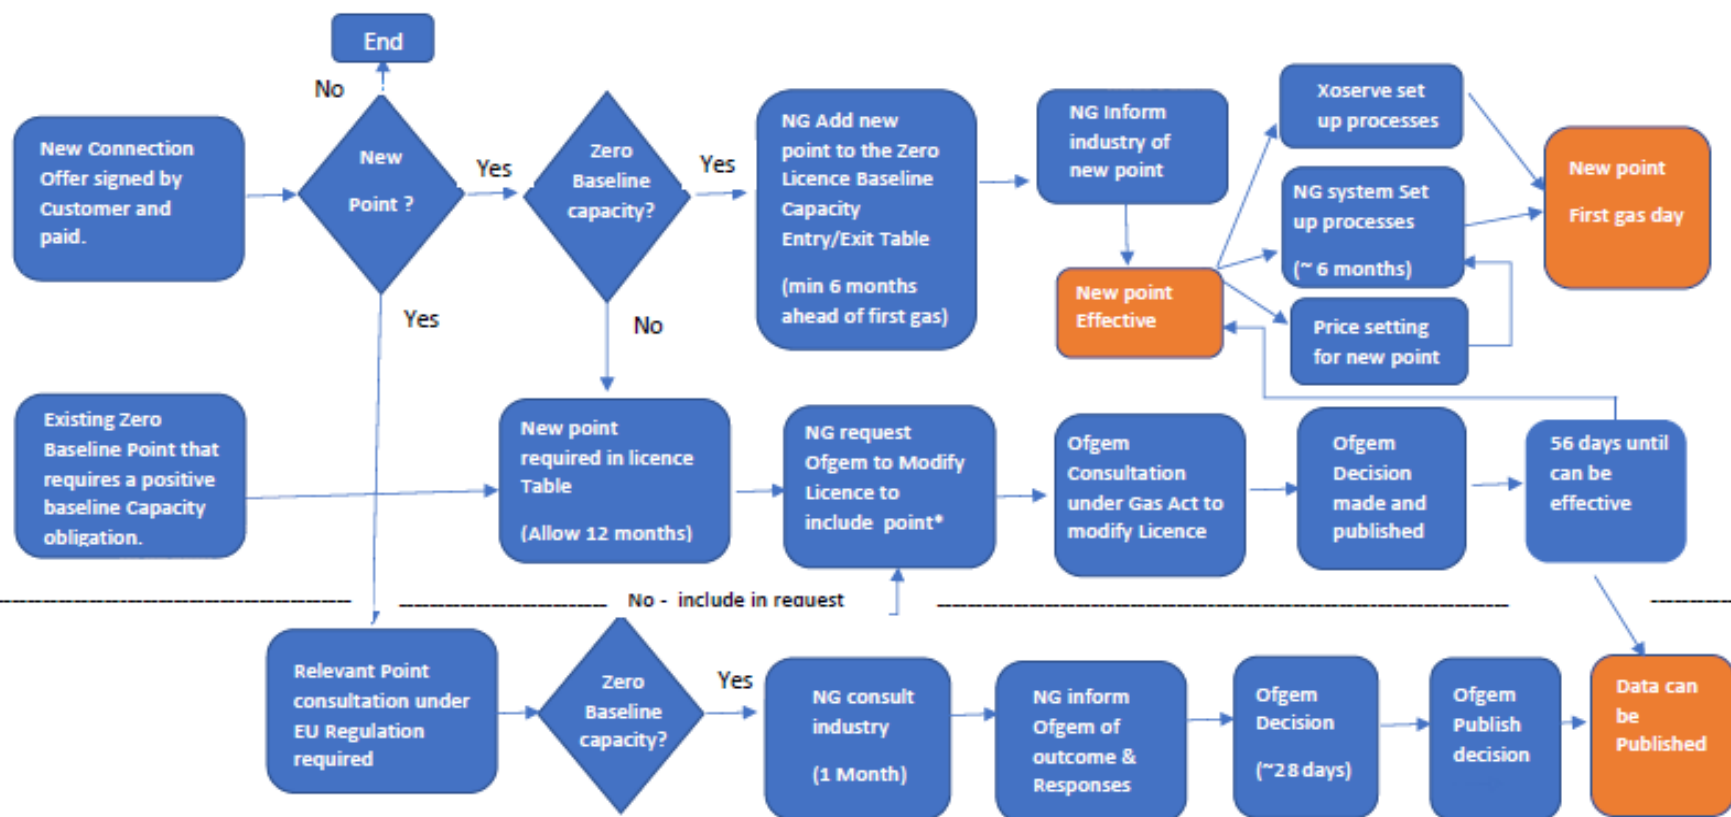

Zero Licence Baseline Capacity Entry/Exit Points

- National Grid to add to new table
- National Grid to inform industry

Relevant Points consultation under EU regulations.

for Zero Baseline Capacity Points

- National Grid to carry out consultation with industry
- Ofgem makes decision

*If request is for an existing zero baseline point to have a baseline capacity then this will include NG removing the point from the Zero Licence Baseline Capacity Table when it is effective in the Licence Table.

Implementation

Implementation is effective from 10th December 2019.

- New report is published for December with the new Table added.
